The Chlamydomonas Sourcebook: Introduction to Chlamydomonas and Its Laboratory Use May 21 2020 Dr. Harris has played a major role in the development of this organism as a model system. Her previous version of the Chlamydomonas Sourcebook which published in 1989, has been a classic in the field and is considered required reading for anyone working with this organism. This latest edition has been expanded to include three volumes providing molecular techniques, analysis of the recently sequenced genome, and reviews of the current status of the diverse fields in which Chlamydomonas is used as a model organism. Methods for Chlamydomonas research and best practices for applications in research, including methods for culture, preservation of cultures, preparation of media, lists of inhibitors and other additives to culture media, are included. Additions to this volume also include help with common laboratory problems such as contamination, student demonstrations, and properties of particular strains and mutants. This volume is part of a 3-Volume Set (ISBN: 978-0-12-370873-1) and is also sold individually. Expanded revision of gold standard reference Includes latest advances in research, including completion of the genome Provides broad perspective with studies in cell and molecular biology, genetics, plant physiology and related fields Available as part of a 3-Volume Set or sold individually

Conversational Repair and Human Understanding Dec 16 2019 Humans are imperfect, and problems of speaking, hearing and understanding are pervasive in ordinary interaction. This book examines the way we 'repair' and correct such problems as they arise in conversation and other forms of human interaction. The first book-length study of this topic, it brings together a team of scholars from the fields of anthropology, communication, linguistics and sociology to explore how speakers address problems in their own talk and that of others, and how the practices of repair are interwoven with non-verbal aspects of communication such as gaze and gesture, across a variety of languages. Specific chapters highlight intersections between repair and epistemics, repair and turn construction, and repair and action formation. Aimed at researchers and students in sociolinguistics, speech communication, conversation analysis and the broader human and social sciences to which they contribute - anthropology, linguistics, psychology and sociology - this book provides a state-of-the-art review of conversational repair, while charting new directions for future study.

Repair and Rehabilitation of Dams Jan 29 2021 This study was conducted to identify methods that have been used in the repair and rehabilitation of concrete dams. Information was obtained through literary searches, discussions with project personnel, and visits to project sites. Each case history includes a background of the project, the deficiency that necessitated repair or rehabilitation, and descriptions of materials and methods used in the repair or rehabilitation. When available, the cost of the repair project and the performance of the repair to date have been included. Case histories included in this report cover a range of deficiencies in concrete structures, including cracking, spalling, erosion, leakage, inadequate PMF capacity,

expansion resulting from alkali-aggregate reaction, instability, and insufficient storage capacity.

Navy Maintenance Oct 06 2021 Pursuant to a congressional request, GAO provided information on the maintenance of Navy ships at overseas locations, focusing on the: (1) amount of maintenance performed at overseas repair facilities and foreign shipyards; (2) operational impact of returning Japan-based ships to the United States for maintenance; (3) costs of returning other U.S. foreign-based ships for maintenance; (4) U.S.-Japan labor cost-sharing agreement; and (5) internal controls ensuring compliance with legislative restrictions on overseas ship repairs. GAO found that: (1) between 1987 and 1991, Navy overseas ship maintenance costs totalled \$1.3 billion, including \$762 million for long-term planned maintenance and \$544 million for corrective maintenance; (2) due to reductions in defense spending, a decreasing fleet size, and foreign labor cost agreements, maintenance costs between 1987 and 1991 decreased by 28 percent; (3) the Navy projected that 1992 to 1998 maintenance costs would total \$1.1 billion; (4) 85 percent of all repairs were performed at three Navy-operated facilities; (5) returning Japan-based ships to U.S. shipyards would conflict with Navy separation and deployment policies which require ships to remain at homeports twice as long as they have been deployed; (6) long-term U.S. facility maintenance costs of Japan-based ships would increase from \$211.7 million to \$741.6 million; (7) Japan's labor cost sharing agreement reduced the total repair costs and, by 1996, Japan will fund 100 percent of the ship maintenance labor costs; and (8) the Navy lacked sufficient internal controls and data to ensure overseas maintenance processes comply with statutory limitations, and has not incorporated legislative limitations on overseas ship repairs into Navy policy and procedures.
