The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as

partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. Nursing administration is designed to teach nursing students about the management process and leadership, and to supply the practicing nurses with practical information about nursing administration. Management skills are important to nurse administrators as their clinical knowledge and skills. Nursing increasingly reflects the population it serves. Nursing profession derives from its ethnic, cultural, social, economic and gender diversity, thereby enhancing its capacity to respond to healthcare needs of people. It is, in fact, that the healthcare organizations of yesterday are the new organizations of today with complex needs. Nursing has a major role to play, so each and every nurse needs to be a leader and speaker for patients; to improve safe and quality care. It also provides inputs into response to changes that are present every day in the healthcare delivery system and its multiple types of healthcare delivery organizations at all levels. This new edition focuses on preparing your students to assume the role as a significant member of the health-care team and manager of care, and is designed to help your students transition to professional nursing practice. I am delighted to be asked to write the Foreword for Management and Practice in Emergency Nursing. More than any other nursing speciality Accident and Emergency work reflects change in society because it is the casualties of social upheaval, imbalance and inequality that you face every day. Here, unfortunately, A and E staff are confronted on a regular basis with child abuse, family violence, the result of terrorist activities, social violence, motor car accidents, personal loss of loved ones, the frustrations and aggression of life. Sometimes, though, some pleasant and funny episodes do occur but all too infrequently to become the norm. My own experience of A and E nursing is very limited; in fact, it goes back to the days of the Department being linked with Orthopaedics and being called 'Casualty' . It could, though, appear that in this day and age the wheel is turning full circle and moves have been made in the last reorganization to link the two new distinct specialities again. This proposal was met with lots of protest from A and E staff which appears to have been defused. The arguments stemmed mainly from the fact that orthopaedics and A and E are two quite difficult specialities of care and skills and as such must be seen as autonomous. This new addition to the Demystified series offers practical, easy-to-understand management advice just for nursing students, nurses, or other types of medical facility administrators faced with the

challenge of managing and motivating a staff.
