This book brings together selected revised papers representing a multidisciplinary approach to language, music, and gesture, as well as their interaction. Among the number of multidisciplinary and comparative studies of the structure and organization of language and music, the presented book broadens the scope with the inclusion of gesture problems in the analyzed spectrum. A unique feature of the presented collection is that the papers, compiled in one volume, allow readers to see similarities and differences in gesture as an element of non-verbal communication and gesture as the main element of dance. In addition to enhancing the analysis, the data on the perception and comprehension of speech, music, and dance in regard to both their functioning in a natural situation and their reflection in various forms of performing arts makes this collection extremely useful for those who are interested in human cognitive abilities and performing skills. The book begins with a philosophical overview of recent neurophysiological studies reflecting the complexity of higher cognitive functions, which references the idea of the baroque style in art being neither linear nor stable. The following papers are allocated into 5 sections. The papers of the section "Language-Music-Gesture As Semiotic Systems" discuss the issues of symbolic and semiotic aspects of language, music, and gesture, including from the perspective of their notation. This is followed by the issues of "Language-Music-Gesture Onstage" and interaction within the idea of the "World as a Text." The papers of "Teaching Language and Music" present new teaching methods that take into account the interaction of all the cognitive systems examined. The papers of the last two sections focus on issues related primarily to language: The section "Verbalization Of Music And Gesture" considers the problem of describing musical text and non-verbal behavior with language, and papers in the final section "Emotions In Linguistics And Ai-Communication Systems" analyze the ways of expressing emotions in speech and the problems of organizing emotional communication with computer agents. A dictionary suitable for English and Spanish speakers at all levels of proficiency, this volume contains over 100,000 entries, with examples of usage including many chosen to help users express themselves in a fluent style. This is the second volume to be dedicated to the pioneering linguistic work produced by the religious missionaries who, within the scope of the European colonial enterprises along the period 1550–1850, described dozens of autochthonous languages, many of which are only known today thanks to their endeavours. The twelve papers joint in the present volume — which dedicated special attention to the orthographical and phonological dimension of their work — provide a comprehensive picture of the descriptive problems faced by these linguists avant la lettre, notably: the difficulties faced before the less familiar features of these languages, such as vowel quantity, accentuation, tonality, nasalization, glottalization, 'gutturalization'; the building of (re)definitions and the creation of a new metalanguage, like 'saltillo', 'guturaciones', etc.; The book elucidates the creativity and innovations proposed by individual missionaries and the instructive and pedagogical dimension of their work. Written entirely in Spanish, the book is designed to help native English speaking students improve their Spanish pronunciation. Appropriate for those with two years of Spanish on up, the text is ideal for lower level classes to catch bad speaking habits before they set in. For upper level classes the book can serve as a tool to refine pronunciation skills. The book is designed to be completed in one semester and covers specific pronunciation issues common to English speakers and solutions to these problems. Side by side English and Spanish word comparisons are made to allow the student to first pronounce the English and then the Spanish words, providing ear training and articulating exercises. A variety of oral exercises are included which can be practiced in groups. Additional resources, including audio pronunciation files for select textbook exercises and a PDF-only instructor's manual, are available at www.hackettpublishing.com.
