Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it

also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. Becoming a culturally proficient leader requires the kind of courage, clarity, and insight that can only come from looking inward first. It's a personal learning journey of will and skill, and if you're up to the challenge, one that will change how you see your school, your students, and yourself as you build your own cultural competence. Consider this second edition of *Culturally Proficient Leadership* your personal road map for navigating that journey. Each chapter of *Culturally Proficient Leadership* invites you to put your experiences up front and challenges you to reframe your story based on multiple viewpoints—now, notably, with the addition of new coauthors Delores Lindsey and Eloise Kemp Terrell, who have their own remarkable stories and insight to share. Overall, all four authors will help you answer the critical question “Is what we say what we do?” utilizing the tools of Cultural Proficiency to engage in Reflections and Cultural Interviews to explore what you learn about those who are culturally different from you develop a Cultural Autobiography to provide a picture of the cultural memberships that have influenced who you are as a person use the Cultural Proficiency Continuum to examine your progress as a leader in serving your students and communities prepare an intentional Leadership Plan that summarizes your journey from Cultural Precompetence to Cultural Proficiency The central “inside-out” premise of Cultural Proficiency is that engaging in deep introspection around one's personal beliefs, values, and behaviors in response to human differences is the first step toward systemic educational reform. We invite you to embark on this journey of self-awareness, of moral courage, and of the life-affirming power of human diversity. “I believe deeply that we cannot solve the challenges of our time unless we solve them together—unless we perfect our union by understanding that we may have different stories, but we hold common hopes; that we may not look the same and may not come from the same place, but we all want to move in the same direction: toward a better future for our children and our grandchildren.” —Barack Obama, *Los Angeles Times*, 2008 Fdns of drug abu
