Encyclopedia of Health Economics Jan 25 2023 The Encyclopedia of Health Economics offers students, researchers and policymakers objective and detailed empirical analysis and clear reviews of current theories and polices. It helps practitioners such as health care

managers and planners by providing accessible overviews into the broad field of health economics, including the economics of designing health service finance and delivery and the economics of public and population health. This encyclopedia provides an organized overview of this diverse field, providing one trusted source for up-to-date research and analysis of this highly charged and fast-moving subject area. Features research-driven articles that are objective, better-crafted, and more detailed than is currently available in journals and handbooks Combines insights and scholarship across the breadth of health economics, where theory and empirical work increasingly come from non-economists Provides overviews of key policies, theories and programs in easy-to-understand language

The Agronomy and Economy of Turmeric and Ginger Aug 28 2020 Turmeric has been used as a medicine, a condiment, and a dye since at least 600 B.C., while ginger has been used extensively throughout history for its medicinal purposes. The Agronomy and Economy of Turmeric and Ginger brings these two important plants together in one reference book, explaining their history, production techniques, and nutritional and medicinal properties in detail. This book is intuitively organized by plant and use, allowing quick access to information. It puts the uniquely Indian use and history of turmeric and ginger plants into a global context of production and economic aspects. It explores the plants from a botanical perspective, and goes into details of their chemical composition as well. Rounding out the book are chapters on disease and pest control issues. The book is a valuable resource for those involved in the production and marketing of these plants, as well as those looking for more information on the medicinal and nutritional properties of turmeric and ginger. The first book to bring together extensive information about turmeric and ginger Incorporates medicinal, nutritional and agricultural aspects of the two plants Offers a global perspective

Economic Risks of Climate Change Dec 24 2022 Climate change threatens the economy of the United States in myriad ways, including increased flooding and storm damage, altered crop yields, lost labor productivity, higher crime, reshaped public-health patterns, and strained energy systems, among many other effects. Combining the latest climate models, state-of-the-art econometric research on human responses to climate, and cutting-edge private-sector risk-assessment tools, *Economic Risks of Climate Change: An American Prospectus* crafts a game-changing profile of the economic risks of climate change in the United States. This prospectus is based on a critically acclaimed independent assessment of the economic risks posed by climate change commissioned by the Risky Business Project. With new contributions from Karen Fisher-Vanden, Michael Greenstone, Geoffrey Heal, Michael Oppenheimer, and Nicholas Stern and Bob Ward, as well as a foreword from Risky Business cochairs Michael Bloomberg, Henry Paulson, and Thomas Steyer, the book speaks to scientists, researchers, scholars, activists, and policy makers. It depicts the distribution of escalating climate-change risk across the country and assesses its effects on aspects of the economy as varied as hurricane damages and violent crime. Beautifully illustrated and accessibly written, this book is an essential tool for helping businesses and governments prepare for the future.

Not So Obvious Aug 20 2022 The first edition of this book was written by Jeffrey Schox for his course "Patent Law and Strategy for Innovators and Entrepreneurs" at Stanford University. After an introduction to intellectual property, it explores the patent system, the requirements for a patent, infringement, and inventorship and ownership issues. The second edition included the America Invents Act ("AIA"), which transformed the U.S. patent system from a "first-to-invent" system to a "first-inventor-to-file" system. The third edition added a glossary and general edits. The fourth edition includes five additional cases: KSR (Supreme Court 2007), *Stanford v. Roche* (Supreme Court 2011), *Prometheus* (Supreme Court 2012), *Nautilus* (Supreme Court 2014), and *Limelight* (Fed. Cir. 2015).

Sex Trafficking in Southeast Asia Nov 30 2020 This book brings an important new perspective to the study of sex trafficking by considering the different types of social contracts which existed in the past that had sexual labour or activity as an inherent component. It outlines the nature of these social institutions – marriage, temporary

marriage, debt bondage, and slavery – which were recognized in local law, carried no stigma, and endured for long periods. It discusses how labour pledged in return for a loan of cash or as a result of a punishment dictated by the state often included sexual labour, and how this could take the form of servicing the master of the house, his guests, or foreign travellers, who paid the debt-holder for the privilege, and how even wives of different ranks, temporary or permanent, and children, were pledged as sureties for loans. The book, which covers the modern states of Myanmar, Thailand, Laos, Cambodia, and Vietnam, argues that cultural norms are not static, that sexual contracts are more complicated than simply ‘marriage’ or ‘prostitution’, and that as trafficking for sexual purposes increases, those engaging in humanitarian intervention should improve their knowledge of the historical underpinnings of cultural understandings of familial and contractual obligations.

The Agronomy and Economy of Important Tree Crops of the Developing World Oct 10

2021 Major tree crops contribute substantially to the economy of many developing countries on the Asian, African and Latin American continents. For example, coffee is the main revenue earner for Kenya. This book provides a comprehensive review of the agronomy, botany, taxonomy, genetics, chemistry, economics, and future global prospects of a range of crops that have great food, industrial and economic value such as cocoa, coffee, cashew, oil palm and natural rubber. Discusses the major tree crops of great economic value to the developing world The author is an eminent scientist who has won numerous awards for his work in this area
