How to Analyze People on Sight or How to Analyze People on Sight Through the Science of Human Analysis: The Five Human Types is a 1921 book by Elsie Lincoln Benedict and Ralph Paine Benedict. This massive authoritative Swahili dictionary is the most definitive and comprehensive in existence. It has taken a team of lexicographers and academics fourteen years to prepare, with the support of the Institute of Kiswahili Research in Dar es Salaam. The last comparative edition was in 1939, and was primarily intended to help the user to

comprehend English texts. The dictionary records new words and meanings of words which the language has acquired since 1939; and provides lexicographical information needed by current dictionary users. There are more than 50,000 entries, with an attempt to give every English word an equivalent in Swahili, or otherwise a phrase; and the vocabulary covers general and specialized language. Guidance is provided on use and connotation, word formation and syntax, and derivatives and compound words. The headword is explicitly shown in each entry. The full information and arrangement given for each entry is: headword, homographs, word class, alternative spelling of a headword, cross-reference, gloss, definition, sense label, usage label, regional label, senses separated by numbers, illustrative examples, compounds, derivatives, and adjectival complementation. From the beloved children's book creator Crockett Johnson comes the timeless Harold and the Purple Crayon! This imagination-sparking picture book belongs on every child's digital bookshelf. Reduce your accent when pronouncing English, with the expertise from an acclaimed specialist in the area. Developed by acclaimed speech consultant and accent specialist Susan Cameron, *Perfecting Your English Pronunciation* features her successful method, which focuses on the anatomical placement of the tongue and on the musculature used in articulation. Where other accent reduction/English pronunciation products rely on solely mimicking of sounds, this work focuses visually, audibly, and narratively on the physical ability to speak English, noting that many sounds of English may be difficult for you because some tongue positions used in English may not be used in your native language. The 45-minute DVD introduces you to mouth and tongue exercises to prepare you for English, then demonstrates mouth and tongue placement using other nonnative speakers like you. You will see and hear how English sounds--enabling you to become more and more comfortable conversing with native English speakers as you go through the program. Many recent studies have shown that mobile learning can provide potential possibilities for foreign language learners to practice language on their smart mobile phones and tablet PCs (e.g. Chang & Hsu, 2011; Egbert, Akasha, Huff, & Lee, 2011; Hoven & Palalas, 2011; Stockwell, 2011). A number of apps have been created and used for English as a Foreign Language (EFL) learning. However, few studies have given effective ex-

of tasks for mobile learning. The majority of the existing apps have not been very pedagogically useful, due to the possible knowledge gap between the app developers and language teachers (Sweeney & Moore, 2012). Therefore, this study aimed to investigate how mobile apps can be integrated into English language teaching and learning and what sorts of tasks can be employed to enhance learners' EFL learning. A class app was created by researchers and integrated into English teaching and learning in and out of class. Questionnaires and interviews were conducted so as to explore students' perceptions about the app. The results indicated that mobile apps can be adopted in English lessons and students' self-study. The app was provided sources related to lessons offered extra support to students to practice English in and after class. Participating students expressed positive attitude towards mobile learning.
