Fall in Love, Have Children, Stay Put, Save the Planet, Be Happy

May 03 2021 A post-coronavirus evolution-based how-to for putting living ahead of work. Bestselling author Frank Schaeffer offers a passionate political, social, and lifestyle "blueprint" for changes millions of us know are needed to rebalance our work lives with thriving relationships: Fall in Love, Have Children, Stay Put,

Save the Planet, Be Happy. Even before everything was disrupted by COVID-19 (not to mention by Trump), millions of Americans were already questioning capitalism's "values." We were already challenging the idea that your job defines you. We already knew something was wrong. Loneliness, frustration, and alienation were already on the rise. Even the most successful of us felt too busy, too

preoccupied, and too distracted to enjoy what we intuitively know are life's greatest rewards: vibrant relationships, family life, connection to others, involvement in our community, and the thrilling experience of love. Fall in Love . . . builds a well-researched and entertaining bridge to living happier lives and to a better future. It shows us that based on a better understanding of

our evolutionary selves, we can thrive in family life and in our work life, too. But to do both joyfully—and at the same time—depends on rediscovering the priority of relationships, connections, community, and love.

Child of Earth Dec 18 2019 Book one of the Sea of Grass trilogy Want to visit another world? It might not be as easy as you think. When Kaer's extended family signs up to emigrate to Linnea, a planet known for horses as large as houses and dangerously mistrustful natives, Kaer is certain the move will bring the divided household closer together.

What none of them are prepared for is the grueling emigration training in the Linnean dome, a makeshift environment designed to be like Linnea in every possible way, from the long, brutally harsh winters to the deadly kacks—wolf-like creatures as tall as men. The training is tough, but Kaer's family is up to the challenge. Soon they begin working like Linneans, thinking like Linneans, even accepting Linnean gods as their own. The family's emigration seems to be just around the corner. But then, a disaster on Linnea itself changes everything.

Just One Planet Sep 19 2022 Just one planet is a story

about a scientist named Professor Green and his assistant Puddles, who make an unbelievable discovery while doing field research. They discover a song coming from a beautiful flower that reminds us that we have just one planet, and we have to take care of it and one another. While hearing the song, Professor Green and Puddles realize what they can do to harmonize with the planet. The song coming from the beautiful flower titled "Just One Planet" is celebrated as a real historical event. So now, you can celebrate National Just One Human Family Day every

September 12th. A portion of the proceeds of each copy of the book will go to the nonprofit Neighbors in Humanity. In this way, it will help advocate for at-risk children on the planet as an example of sharing just one planet. It will also support the purchase of food, water, shelter, medical supplies, and education for such children. In this way, the story of the book will serve its purpose. Planet Middle School Aug 06 2021 It happens to every parent. One day, you have a sweet son or daughter who loves to snuggle on the couch and who puts a smile on your face just by walking into

the room. The next day, it's as if someone left the door open and let in an alien with a smart mouth and an attitude that, frankly, you could do without. Entering middle school is like stepping onto a different planet--for parent and child alike. It's a planet where peer pressure, social media, and hormones can wreak havoc in your child's life and in your relationship with him or her. But these years don't have to create chaos in your family. Parenting expert and New York Times bestselling author Dr. Kevin Leman's time-tested principles will aid parents in helping

their middle schooler not only survive but thrive during these turbulent years on Planet Middle School. He shows parents how to - understand their child's rapidly expanding world - respond rather than react to emotional swings - tell their child about sex (before someone else tells them their version) - create opportunities for their child to practice selflessness and gratitude - ensure that their kid is one who loves home and family Middle schoolers can be a weird, unpredictable species. But with a little help from Dr. Leman, parents will be able to ride out the interstellar

storm with humor and confidence.
A Child's Geography Dec 30 2020 An exploration of the physical geography of the planet earth from a Christian point of view.
One Child May 15 2022 The problem -- The right to a family -- The right to control your body -- Sanctions -- The future -- Unexpected consequences -- When?
Only One Mar 21 2020 This lyrical, environmentally focused picture book showcases the unique beauty of our one and only universe--its galaxies, stars, and planets--as well as our one and only Earth and the precious life it contains. Join one girl as she leads her

friends to a tree-planting ceremony. Along the way, she explains in simple language the value of the universe and Planet Earth. Readers will see the Big Bang, the Milky Way, all the planets in the solar system, as well as Earth's atmosphere, and the life within it: its oceans, trees, bugs, and seven billion human beings. Finally, the girl and her friends plant a tree--doing one small thing to help their one special planet. Both informative and inspiring, here is a beautifully written and gorgeously illustrated science picture book about our universe that will encourage young readers and listeners to protect and preserve the

environment.
Here We Are Jun 04 2021 #1 New York Times bestseller A TIME Magazine Best Book of the Year A NPR Best Book of 2017 A Boston Globe Best Book of 2017 "Moments of human intimacy jostle with scenes that inspire cosmic awe, and the broad diversity of Jeffers's candy-colored humans...underscores the twin messages that 'You're never alone on Earth' and that we're all in this together."-- Publisher's Weekly (starred review) "A true work of art."-- BuzzFeed Oliver Jeffers, arguably the most influential creator of picture books today, offers a rare personal look inside his own

hopes and wishes for his child--and in doing so gifts children and parents everywhere with a gently sweet and humorous missive about our world and those who call it home. Insightfully sweet, with a gentle humor and poignancy, here is Oliver Jeffers' user's guide to life on Earth. He created it specially for his son, yet with a universality that embraces all children and their parents. Be it a complex view of our planet's terrain (bumpy, sharp, wet), a deep look at our place in space (it's big), or a guide to all of humanity (don't be fooled, we are all people), Oliver's signature wit and humor combine with a

value system of kindness and tolerance to create a must-have book for parents. Praise for Here We Are: - "A sweet and tender distillation of what every Earthling needs to know and might well spend a lifetime striving to achieve. A must-purchase for new parent shelves"--School Library Journal -"From the skies to the animal kingdom to the people of the world and lots of other beautifully rendered examples of life on Earth, Here We Are carries a simple message: Be kind." --NPR -"[An] enchanting gem of a children's book"--NBC's Today Show - "A must-have book for parents."--

Gambit -"A celebration of people all shapes and sizes, and of the beauty and mystery of our Earth."--Booklist - "...a beautifully illustrated guide to living on Earth and being a good person."--Brightly - [Here We Are] is a tour through the land, the sea, the sky, our bodies; dioramas of our wild diversity....[Jeffers] is the master of capturing the joy in our differences."--New York Times Book Review [One Planet, One Health](#) Aug 18 2022 One Planet, One Health provides a multidisciplinary reflection on the state of our planet, human and animal health, as well as the critical effects

of climate change on the environment and on people. Climate change is already affecting many poor communities and traditional aid programs have achieved relatively small gains. Going beyond the narrow disciplinary lens and an exclusive focus on human health, a planetary health approach puts the ecosystem at the centre. The contributors to One Planet, One Health argue that maintaining and restoring ecosystem resilience should be a core priority, carried out in partnership with local communities. One Planet, One Health offers an integrated approach to improving the

health of the planet and its inhabitants. With chapters on ethics, research and governance, as well as case studies of government and international aid-agency responses to illustrate successes and failures, the book aims to help scholars, governments and non-governmental organisations understand the benefits of focusing on the interdependence of human and animal health, food, water security and land care.

Our Earth Aug 26 2020 Ten profiles of amazing young environmental activists. Each child is captured in a portrait, their achievements described, and

filled out with photos. Ends with tips for kids to make a difference.

'One Planet'

Cities Dec 10 2021

This book addresses the crucial question of how the essential needs of the growing human population can be met without breaking the Earth's already-stretched life-support system. With four out of five people predicted to be urban dwellers by 2080, 'One Planet' Cities proposes a pathway to genuine sustainability for cities and neighbourhoods, using an approach based on contraction and convergence. Utilising interviews with key players, including the Global

Footprint Network, World Future Council, WWF, mayors and government officials, and case studies from across the globe, including Europe, North and South America, Australia, South Africa, China and India, David Thorpe examines all aspects of modern society from food provision to neighbourhood design, via industry, the circular economy, energy and transport through the critical lens of the ecological footprint and relevant supporting international standards and indicators. Recommendations on managing supply chains and impacts, how the transition

to a world within limits might be financed, and a deep examination of the Welsh Government's pioneering efforts follow. It concludes with an imagined vision of what a genuinely sustainable future might be like, and an appeal for 'one planeters' everywhere to step up to the challenge. This book will be of great interest to practitioners and policymakers involved in governance, administration, urban environments and sustainability, alongside students of the built environment, urban planning, environmental policy and energy. **Our Earth** Apr 14 2022 Profiles

twelve children who have had an impact on the environment, from a Canadian girl who gave a major speech to a Malawian boy who brought electricity to his village and a Chinese boy who works to keep endangered animals from the market.

Play Therapy with Traumatized

Children Apr 21 2020

INTRODUCING A PRACTICAL MODEL OF PLAY THERAPY FOR TRAUMATIZED CHILDREN Some of the most rewarding work a therapist can do is help a child recover from a traumatic event. But where to begin? A growing body of play therapy literature offers many specific

techniques and a variety of theoretical models; however, many therapists are still searching for a comprehensive model of treatment that incorporates solid theoretical constructs with effective play therapy interventions. Clinicians have long recognized that trauma therapy is not just a matter of techniques but a journey with a beginning, middle, and end. In a pioneering contribution to the field, *Play Therapy with Traumatized Children: A Prescriptive Approach*, the author codifies the process in her model, *Flexibly Sequential Play Therapy (FSPT)*.

Integrating non-directive and directive approaches, this components-based model allows for the uniqueness of each child to be valued while providing a safe, systematic journey towards trauma resolution. The FSPT model demystifies play-based trauma treatment by outlining the scope and sequence of posttraumatic play therapy and providing detailed guidance for clinicians at each step of the process. Dramatically demonstrating the process of healing in case histories drawn from fifteen years of clinical practice with traumatized children, *Play*

Therapy with Traumatized Children addresses: Creating a safe place for trauma processing
Augmenting the child's adaptive coping strategies and soothing his or her physiology
Correcting the child's cognitive distortions
Ensuring that caregivers are facilitative partners in treatment
Inviting gradual exposure to trauma content through play
Creating developmentally sensitive trauma narratives
Using termination to make positive meaning of the post-trauma self
[One Planet One People](#) Mar 01 2021
One Planet, One People does a wonderful job of

setting the ethical challenges of creating a functional global society in an evolutionary framework that reaches back to our beginnings. What we have to do today is much like what we have repeatedly done in the past, create ever larger scale institutions to increase cooperation and regulate conflict.- Professor Peter J. Richerson, Department of Environmental Science and Policy, University of California, DavisThe question of when and why religions ever started and how they evolved, as science uncovered so many earlier mysteries, is most fascinating. This

book works through the issue, a step at a time, to a clear and well argued position. Not every reader will agree, but every reader will have sharpened his own beliefs and be gratified by the experience.-Louis W. Cabot, Chairman Emeritus, The Brookings InstituteIn this succinct, highly readable overview of the evolution of human society, the author argues that the 21st century will witness a crucially important and difficult transition for the human race. Blending the disciplines of anthropology and evolutionary psychology with over thirty years of experience in the diplomatic corps,

Coon traces the evolution of the human tendency to divide others into two groups, us versus them. People tend instinctively to behave altruistically toward members of their own in-group, and to react with suspicion, or even hostility, toward outsiders. He points out that complex human societies became possible only when cultural attitudes and mechanisms became accepted that encouraged individuals to define their in-groups in more expansive ways. Thus small kin-based bands grew into villages, kingdoms, and, eventually, the modern nation-state. Today, he argues, we have

reached a stage where the whole world must be viewed as us, for only a united world community can cope with today's global challenges. Coon concludes by discussing the difficulties of making this final transition to a world community and the role the United States should take in leading the way. He deplores the recent unilateral trend of U.S. foreign policy, and advocates strengthening the United Nations. Coon's broad international experience combined with an admirable ability to synthesize the latest research from anthropology and evolutionary

psychology results in many original insights and fresh ways of evaluating today's global challenges. This is an extraordinary book that offers a new context to a crucially important message. Carl Coon (Washington, DC) served in the US Foreign Service for more than thirty-five years, during which time he lived and worked in many lands and cultures in both the East and the West. He was ambassador to Nepal from 1981 to 1984. *Our Planet: The One Place We All Call Home* Dec 22 2022 The official children's book to the Netflix original documentary series, *Our Planet*, with a foreword by Sir David

Attenborough. *Wild In The City* May 23 2020 Discover the secret lives of the extraordinary creatures that share our cities. From red foxes sneaking rides on London buses to leopards prowling the backstreets of Mumbai, this book explores the clever ways animals have adapted to the urban environment and gives tips on how you can help protect our wild neighbours.

A Wrinkle in Time Nov 16 2019 Madeleine L'Engle's ground-breaking science fiction and fantasy classic, now a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace,

and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of

the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. *A Wrinkle in Time* is the winner of the 1963 Newbery Medal. It is the first book in *The Time Quintet*, which consists of *A Wrinkle in Time*, *A Wind in the Door*, *A Swiftly Tilting Planet*, *Many Waters*, and *An Acceptable Time*. *A Wrinkle in Time* is now a movie from Disney, directed by Ava DuVernay, starring Storm

Reid, Oprah Winfrey, Reese Witherspoon and Mindy Kaling. This title has Common Core connections. Books by Madeleine L'Engle *A Wrinkle in Time Quintet* *A Wrinkle in Time* *A Wind in the Door* *A Swiftly Tilting Planet* *Many Waters* *An Acceptable Time* *A Wrinkle in Time: The Graphic Novel* by Madeleine L'Engle; adapted & illustrated by Hope Larson *Intergalactic P.S. 3* by Madeleine L'Engle; illustrated by Hope Larson: A standalone story set in the world of *A Wrinkle in Time*. *The Austin Family Chronicles Meet the Austins (Volume 1)* *The Moon by Night (Volume 2)* *The Young Unicorns (Volume*

3) A Ring of Endless Light (Volume 4) A Newbery Honor book! Troubling a Star (Volume 5) The Polly O'Keefe books The Arm of the Starfish Dragons in the Waters A House Like a Lotus And Both Were Young Camilla The Joys of Love

One Earth Feb 12 2022 Celebrate our planet and discover easy ways to take care of it with this picture book that's perfect for budding environmentalists and nature lovers. Kids can count reasons to love the planet and ways to protect it in the pages of this conservation-themed book. Gentle verse reminds the reader of Earth's beauties--starting with "one wide sweeping sky,

two honey bees" and continuing all the way to "ten fields to plow." The text then starts counting backwards, listing simple ways children can help, such as reducing waste and reusing items. The conclusion takes us back to number one with the book's key message: "One Earth so beautiful. Remember--only one." At once celebration and challenge, this book will encourage children to take better care of the planet.

My First Book of Planets: All about the Solar System for Kids Jan 19 2020
The Story of the Blue Planet Oct 28 2020 Brimir and Hulda are best

friends who live on a small island on a beautiful blue planet where there are only children and no adults. Their planet is wild and at times dangerous, but everything is free, everyone is their friend, and each day is more exciting than the last. One day a rocket ship piloted by a strange-looking adult named Gleesome Goodday crashes on the beach. His business card claims he is a "Dream.ComeTrue Maker and joybringer," and he promises to make life a hundred times more fun with sun-activated flying powder and magic-coated skin so that no one ever has to bathe again. Goodday even nails

the sun in the sky and creates a giant wolf to chase away the clouds so it can be playtime all the time. In exchange for these wonderful things, Goodday asks only for a little bit of the children's youth—but what is youth compared to a lot more fun? The children are so enamored with their new games that they forget all the simple activities they used to love. During Goodday's great flying competition, Hulda and Brimir fly too high to the sun and soar to the other side of planet, where they discover it is dark all the time and the children are sickly and pale. Hulda and Brimir know that without their help, the pale children

will die, but first they need to get back to their island and convince their friends that Gleesome Goodday is not all that he seems. A fantastical adventure, beautifully told, unfolds in a deceptively simple tale. The Story of the Blue Planet will delight and challenge readers of all ages.

Hidden Wonders

Oct 08 2021 Take a journey into the unknown and discover the planet's wildest and most wonderful sights. Paddle through the eerie glowworm caves of New Zealand, ride with the wild horses of the Namib desert, and swing off the end of the world in Ecuador. Packed with

8 Little Planets Sep 07 2021 An exciting introduction to the solar system from Chris Ferrie, #1

science book writer for children, and creator of the Baby University series 8 little planets with the Sun at the center. each one wishing it were a little bit better... Old slow Neptune felt it was behind. 165 years to circle the sun is an awful long time! the 8th little planet did not worry. It spins on its axis in a really big hurry To the tune of "Ten Little Monkeys Jumping on the Bed" comes a new bedtime story from bestselling author Chris Ferrie that's sure to get little ones excited about the solar system while learning new facts about each planet!

Seven Worlds One Planet Mar 13 2022 Welcome home. A place 200 million

years in the making. Long ago, our planet had only one gigantic land mass. Then something monumental happened. That supercontinent ruptured and seven different worlds were born. Each of those worlds - or continents - evolved, and continues to evolve, its own way of life. From the jungle of the Congo or the majestic Himalayas to the densely populated wilds of Europe or the comparatively isolated Australasia, Seven Worlds, One Planet explores the natural wonders that give each of our continents its distinct character. Following the animals that have

made these iconic environments their home, it discovers spectacular wildlife stories that reveal what makes each of these seven worlds unique. With a foreword by Sir David Attenborough and over 250 breathtaking images, including stills from the BBC Natural History Unit's spectacular footage, *Seven Worlds, One Planet* is a stunning exploration of the planet, and the worlds within it, that we call home. *The New 50 Simple Things Kids Can Do to Save the Earth* Jul 25 2020 In The New 50 Simple Things Kids Can Do to Save the Earth, Sophie and John have revised the original best-selling book for a

concerned and vibrant Web 2.0 youth market. It's easy-to-do and kid-friendly projects show that kids can make a difference, and each chapter is packed with tons of links to groups and resources. What makes this book stand out, though, is that it doesn't just inform kids, it encourages them to make a difference by providing them, their friends and their families the tools to take action. Together, John and Sophie enlighten, educate, and encourage our children with easy and smart ways to save the earth. Pretty darn cool, huh? We thought so. What you can do: Order now and help save the only earth we've got.

Mother Earth needs our help now. **Here We Are** Feb 18 2020 #1 New York Times bestseller A TIME Magazine Best Book of the Year A NPR Best Book of 2017 A Boston Globe Best Book of 2017 "Moments of human intimacy jostle with scenes that inspire cosmic awe, and the broad diversity of Jeffers's candy-colored humans...underscores the twin messages that 'You're never alone on Earth' and that we're all in this together."-- Publisher's Weekly (starred review) "A true work of art."-- BuzzFeed Oliver Jeffers, arguably the most influential creator of picture books today, offers a rare personal look

inside his own hopes and wishes for his child--and in doing so gifts children and parents everywhere with a gently sweet and humorous missive about our world and those who call it home. Insightfully sweet, with a gentle humor and poignancy, here is Oliver Jeffers' user's guide to life on Earth. beautifully illustrated picture book about a child's right to advocate for the environment they live in. All children have the right to learn about the world, to celebrate the water, air and sunshine, and to be curious about the animals and plants that live on our planet. All children also have the right to learn about endangered species, to be concerned about plastic in the ocean, and to understand what a changing climate means for our Earth. Scientists tell us that every living thing is connected. When we cut down forests, we destroy animal habitats. When we throw plastic in the garbage, it never

really goes away. When we spray pesticides on our fruit and vegetables, we poison the earth, animals and ourselves. What can children do to help? All children can draw posters of endangered animals to raise awareness. All children can send a letter to the leader of their country, signed by every member of their family. All children can protest along with their parents. Children have the right to do all these things as proclaimed in the United Nations Convention on the Rights of the Child. All children have the right to try to help our Earth, in whatever ways they can. Told from the

perspective of a child, this colorful and vibrant book explores what it means to be a child who dreams of a beautiful future for their planet. Correlates to the Common Core State Standards in English Language Arts: CCSS.ELA-LITERACY.RI.2.6 Identify the main purpose of a text, including what the author wants to answer, explain, or describe.

To Change a

Planet Jun 23 2020

One person. Small, quiet, insignificant. But when one person, and one person, and one person become many, they can change a planet. Spare, poetic text and breathtaking pictures invite readers on a stirring journey that gently illuminates the causes of climate change as well as how our individual and collective actions can make the world better. With calm, truthfulness, and beauty, *To Change a Planet* demonstrates the

importance of caring for our planet. Eye popping explosions of color on every page create a stunning visual narrative that invites readers to find and follow the same characters through their daily lives and ultimately to a climate march on Washington, where their storylines converge. Clear endnotes vetted by a climate expert answer a myriad of questions in simple language. Meticulously researched and brimming with hope and hands-on solutions that will edify and empower even the youngest readers, *To Change a Planet* is a loving ode to our only home and vital for every child, classroom, and

family. * "Earth's beauty and fragility provide the impetus for activism in this introduction to climate change...An attractive entree to a vital subject for the youngest citizens." - Kirkus Reviews, starred review "The book's overall tone is hopeful, centered around the conviction that, just as we can exacerbate the effects of climate change, so too can we forestall and reverse them." - School Library Journal "Has the potential to inspire all." - Shelf Awareness

About Lonely Planet
Kids: From the
world's leading
travel publisher
comes Lonely
Planet Kids, a
children's imprint
that brings the
world to life for
young explorers
everywhere. With a
range of beautiful
books for children
aged 5-12, we're
kickstarting the
travel bug and
showing kids just
how amazing our
planet can be. From
bright and bold
sticker activity
books, to beautiful

gift titles bursting
at the seams with
amazing facts, we
aim to inspire and
delight curious
kids, showing them
the rich diversity of
people, places and
cultures that
surrounds us. We
pledge to share our
enthusiasm and
love of the world,
our sense of
humour and
continual
fascination for what
it is that makes the
world we live in the
diverse and
magnificent place it
is. It's going to be a
big adventure -
come explore!
*My Little Blue
Planet* Jan 23 2023
A story for children
about why we
should care for our
little blue planet,
the only home we
have, to teach
ecology,
sustainability and

responsibility.
[I Am Earth](#) Oct 16
2019 [I Am Earth](#)
introduces kids to
the basic concepts
of earth science
while also
encouraging the
importance of
taking care of our
special planet
through
environmental
awareness and
sustainability.
Keeping Earth a
happy healthy place
to live is important
for everyone big
and small. In this
Earth science book
for beginners, kids
learn what makes
our planet so
uniquely special
and how people can
work together to
keep it a healthy
home.
