Discusses the equipment, skills and techniques, safety issues, and more related to snowmobiling. Snowmobiling has become popular today in North America, particularly with families. It encompasses a variety of styles, including on-trail riding, cross-country riding off trails, boon docking in regions of forests, and hill climbing in mountainous areas. Snowmobile clubs build, maintain, and map new trails. Readers learn about creating a snow plan so that others know where to look if there are any problems while snowmobiling. This informative volume examines the history of the snowmobile as well as the proper riding gear, accessories, and equipment that are required for the sport. Safety rules and trail signing are also described. The Golden Age of snowmobile manufacturing went from 1968 to 1976. During this time literally hundreds of snowmobile manufacturers sprang up and then disappeared. Some of these manufacturers were huge blue chip corporations like John Deere. Others were small forgotten companies building sleds in home garages such as the Snow Bug. The collector market for vintage snowmobile items can be easily compared to the interest in vintage motorcycles, farm tractors, gas station items, vintage boats and outboards and similar motorized vehicles. This book covers snowmobile-related items which are now collectible-vintage brand-specific clothing, advertising items, dealer signs, oil containers, snowmobile board games, snowmobile cuff links, and much more. Collectors new and old are trying to determine what an item is worth and if it is collectible. This is the first book to fill that need. Hand picked photos & in-depth captions document the development of Ski-Doo's racing sleds from inception to the present. Though it's been said the first snowmobile race was held the day the second machine was built, the first organized race to capture wide attention was in December 1961 with about 40 entrants. After discovering the impact of this first race, Ski-Doo began devoting attention to building racing sleds in 1967 and still builds models specifically for racing even today. Most engine, suspension system, and chassis improvements in the snowmobile industry are attributed to the efficiencies requested by racing. This book includes some of today's most collectible production snowmobiles like the TNT and BLIZZARD models, along with custom one-off models designed specifically for racing. Many of these interesting Ski-Doo photographs have never been published before. "The Legend of Polaris" recounts the remarkable saga of the company that invented the snowmobile. After becoming the number one manufacturer of snowmobiles, Polaris went on to create the first automatic transmission ATV; a line of stable, reliable personal water craft; a sport-boat line; and Victory, the company's celebrated motorcycles. With the help of the Clymer Vintage Snowmobiles Volume 1â?? "I loved Ralph Plaisted like my own dad. But even if you didn't know Ralph and his team, you will love this book. Ralph taught me the true spirit of adventure by living it. Who else could sit over a glass of scotch in Duluth looking out over Lake Superior's stark winter ice cap and dream of conquering the North Pole by snowmobile? Who else could realize that dream of having a United States Air Force plane radio to him at the Pole proclaiming 'Plaisted, every direction from where you fellas are is south!' That could--only--be Ralph. First to the Pole engages the reader on every twist and turn of this amazing journey. A journey that not only captures the North Pole, but the true spirit of adventure which was the fabric of my dear friend and wilderness mentor, Ralph Plaisted." --Eric Gislason, Longtime KSTP-TV Sports Reporter/Outdoor TV Show Host/Storyteller

The story of the company that was founded by the inventor of the snowmobile. In 1942, Joseph-Armand Bombardier invented the snowmobile and founded his company to manufacture them. From its humble beginnings as an entrepreneurial company in rural Quebec, led by an enterprising inventor, Bombardier Inc. has emerged as a global leader in the transportation industry. This book tells the fascinating tale of this remarkably well managed company that has enjoyed spectacular growth in its chosen markets through strong leadership and management strategy, succession planning, strategic diversification, and turnaround and acquisition artistry. The fascinating story of the world's largest rail manufacturer for both railway and subway. Reveals why Bombardier Inc. is a multi-faceted global company yet nobody knows their name. Written by Larry MacDonald the author of Nortel Network. The Bombardier Story shows how invention and entrepreneurship, management and leadership, smooth succession planning, and turnaround and acquisition built this global powerhouse. Sketches the history of the Ski-Doo snowmobile, describes each model from 1959 to the present, and traces the development of engines, suspensions, and tracks. Explains the history, equipment, techniques, and safety factors of snocross. Long respected as a manufacturer of sturdy agricultural machinery, the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon, Wisconsin. Starting with a lawn and garden tractor in 1963, Deere soon entered the fast-growing snowmobile market, introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather-dependent market. This detailed history, written by two key participants in the snowmobile program, describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front-engine and water-cooled models; the process of selecting engines and negotiating with suppliers, including when problems developed; and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth, and of the people and processes that made it all happen.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor. Did you know that snowmobile snocross racers can soar 100 feet (30 meters) through the air before landing? They race around sharp turns and fly over jumps with other riders all around them. Some racers reach speeds up to 120 miles (193 kilometers) per hour. They compete for prizes in races all over the world. Enter the Extreme Winter Sports Zone to learn about the history, gear, moves, competitions, and top athletes connected to snowmobile snocross. You'll discover:

- How racers stay ahead of the competition on icy tracks.
- How to stay safe on a speeding snowmobile.
- Where to

watch the world's most daring snocross racers. • How snowmobile snocross became popular with sports fans everywhere. Are you into sports? Then get in the zone! Joseph-Armond Bombardier devoted his entire life to finding mechanical designs that would help conquer the elements in his part of the world — Valcourt, Quebec, Canada, where winters are long and deep with snow. One of his greatest inventions was a motorized snow vehicle, the first of which allowed a missionary friend of his to cross miles of woods that would have not otherwise been passable. From that first Bombardier snow machine to the newer Formula series models, all Ski-Doo snowmobiles to 1995 are covered in this Collector's Guide to Ski-Doo Snowmobiles. The book traces the development of the snowmobiles, their engines, suspensions, and comfort features. It takes you from the age of wooden skis and bodywork to today's light, powerful, and aerodynamic Ski-Doo models. Technical specifications and year-by-year updates are included, along with 135 photos. An exciting new series of high interest books that will appeal to even the most reluctant readers contains action-packed photographs and stories of the hottest racing vehicles and races for kids. The Bombardier Story describes how close to ruin the company came, and how it survived a drastic shakeout that reduced the number of players in the snowmobile industry from over 100 to just three."--BOOK JACKET. In 1922, when Joseph-Armond Bombardier was fifteen years old he built his first snow vehicle. He had always loved to tinker with motors and make things go, and he dreamed of building a vehicle that could go over snow. His first attempt, using a Model T Ford engine and a wooden propeller, worked well. To Joseph-Armond's mind, anyhow. Not so much his father, who made him take the contraption apart. Over the years, Joseph-Armond dreamed of becoming a great mechanic and inventing machines. But when his young son died of a fever because it was impossible

to get to the hospital over the snow-covered roads, Joseph-Armand applied his single-minded determination to building a vehicle that could go over snow. It took years, but he accomplished his goal. His invention changed the way people in snow country lived. Inaccessible roads could now be travelled, taking patients to hospitals, doctors and priests to the needy, children to school, and even mail to residents. Follow Edgar Hetteen from poverty to millionaire as he starts Polaris and Artic Cat snowmobile companies. "No machine comes close to it." Those were the words of Dr. J.R. Weber, research scientist for the Canadian government working in the far north, in describing one of the first snowmobiles to be made - the one that was produced in Sudbury, Ontario. "I would suggest to anyone interested in learning more about "snowmobiles of the past" that this book is interesting." Ed Skomoroh, Vice President, Marketing, Polaris Industries, Inc. "Very interesting Reading!" Edgar Hetteen [founder of Polaris] Known for its working ability rather than for speed, the Snowbug was valued by trappers, hunters, mining and government officials as well as doctors and social workers whose duties took them into all types of weather and snow conditions in the north. Its popularity spread from Canada to northern Michigan and the New England States where heavy snowfalls also prevail Snow Goer magazine has combed its comprehensive archive of articles from long-time contributor David Wells to assemble a collection of profiles of the most interesting machines that the sport has ever seen. There is an impressive array of machines, including sleds from the four surviving major brands--Polaris, Ski-doo, Yamaha, and Arctic Cat--and many other well-known names like Ariens, Bolens, Evinrude, and Johnson, and even some obscure names like Roll-O-Flex and Dauphin. In addition to the profiles, there are background features on "Snowbikes" through the years, a look at "rebadging," and an in-depth flashback to the fabulous factory speed run and stock racing wars of the early 1970's.
