*Sufism Dec 16 2019 A pathbreaking history of Sufism, from the earliest centuries of Islam to the present After centuries as the most important ascetic-mystical strand of Islam, Sufism saw a sharp decline in the twentieth century, only to experience a stunning revival in recent decades. In this comprehensive new history of Sufism from the earliest centuries of Islam to today, Alexander Knysh, a leading expert on the subject, reveals the tradition in all its richness. Knysh explores how Sufism has been viewed by both insiders and outsiders since its inception. He examines the key aspects of Sufism, from definitions and discourses to leadership, institutions, and practices. He devotes special attention to Sufi approaches to the Qur'an, drawing parallels with similar uses of scripture in Judaism and Christianity. He traces how Sufism grew from a set of simple moral-ethical precepts into a sophisticated tradition with professional Sufi masters (shaykhs) who became powerful players in Muslim public life but whose authority was challenged by those advocating the equality of all Muslims before God. Knysh also*

examines the roots of the ongoing conflict between the Sufis and their fundamentalist critics, the Salafis—a major fact of Muslim life today. Based on a wealth of primary and secondary sources, Sufism is an indispensable account of a vital aspect of Islam.

Shi'ism in Southeast Asia Feb 27 2021 This is the first work available in any language to extensively document and critically discuss traditions of 'Alid piety and their modern contestations in the region. The concept of 'Alid piety allows for a reframing of our views on the widespread reverence for 'Ali, Fatima and their progeny that emphasizes how such sentiments and associated practices are seen as part of broad traditions shared by many Muslims, which might or might not have their origins in a specifically Shi'a identity. In doing so, it facilitates the movement of academic discussions out from under the shadow of polemical sectarian discourses on 'Shi'ism' in Southeast Asia. The chapters include presentations of new material from previously unpublished early manuscript sources from Muslim vernacular literatures in the Malay, Javanese, Sundanese, Acehnese and Bugis languages, as well as rich new ethnography from across the region. These studies engage with cultural, intellectual, and performative traditions, as well as the ways in which 'Alid piety has been transformed in relation to more strictly sectarian identifications since the Iranian revolution in 1979.

Vehicle Feedback and Driver Situation Awareness Jun 14 2022 A potentially troubling aspect of modern vehicle design – some would argue - is a trend for isolating the driver and reducing vehicle feedback, usually in the name of comfort and refinement but increasingly because of automation. There is little doubt cars have become more civilised over the years, yet despite this, the consequences of driver behaviour remain to a large extent anecdotal. Readers will have heard such anecdotes for themselves. They usually take the form of drivers of a certain age recalling their first cars from the 1970s or 80s, in which "doing 70 mph really felt like it". The question is whether such anecdotes actually reflect a bigger, more significant issue that could be better understood. Related questions have been explored in other domains such as aviation, where the change to 'fly-by-wire' did indeed bring about some occasionally serious performance issues that were not anticipated. Despite some clear parallels, automotive systems have been left relatively unstudied. The research described in this book aims to explore precisely these issues from a Human Factors perspective. This means connecting the topics of vehicle feel, vehicle dynamics, and automotive engineering with the latest research on driver situation awareness. The problem is explored experimentally from a variety of theoretical viewpoints but the outcomes are consistently practical. Here we have a promising new avenue along which the driver experience can be enhanced in novel and insightful ways. Tools and templates are provided so that engineers and designers can try different ways to boost vehicle safety, efficiency and enjoyment from a human-centered perspective. Association of American Publishers (AAP) Finalist for the 2019 PROSE Award Features Diagnosis of how vehicle feel impacts driver situation awareness, and how this could aid future vehicle designs Multi-theory approach to driver situation awareness, and how different views

of this important concept give rise to different insights Comprehensive analysis of situation awareness in driving, the information requirements of drivers, and how these needs can be supported Practical descriptions of how state-of-science Human Factors methods have been applied in practice

Chaos in Yemen Sep 05 2021 Chaos in Yemen challenges recent interpretations of Yemen's complex social, political and economic transformations since unification in 1990. By offering a new perspective to the violence afflicting the larger region, it explains why the 'Abdullah 'Ali Salih regime has become the principal beneficiary of these conflicts. Adopting an inter-disciplinary approach, the author offers an alternative understanding of what is creating discord in the Red Sea region by integrating the region's history to an interpretation of current events. In turn, by refusing to solely link Yemen to the "global struggle against Islamists," this work sheds new light on the issues policy-makers are facing in the larger Middle East. As such, this study offers an alternative perspective to Yemen's complex domestic affairs that challenge the over-emphasis on the tribe and sectarianism. Offering an alternative set of approaches to studying societies facing new forms of state authoritarianism, this timely contribution will be of great relevance to students and scholars of the Middle East and the larger Islamic world, Conflict Resolution, Comparative Politics, and International Relations.

Al-Qaeda Nov 26 2020 Since the attacks of September 11th 2001 and up to and beyond Osama bin Ladin's death, al-Qaeda has come to embody the new enigmatic face of terrorism, dominating discussions of national and international security. Yet in spite of the attention it receives, conflicting assumptions about the group abound. Is al-Qaeda a rigidly structured organization, a global network of semi-independent cells, a franchise, or simply an idea whose time has come? What is meant by talk of the 'global Salafi jihad' that is confronting the West? What are the implications of bin Ladin's death? Christina Hellmich offers a critical examination of the widely-held notions regarding the origins and manifestations of al-Qaeda and the sources on which they rely, mapping the organisation's alleged transition from what began as a regional struggle against the Soviets in Afghanistan to the increasingly leaderless jihad of the post-9/11 world. Rather than just providing yet another biography of al-Qaeda, Hellmich forensically examines discrepancies between the most common explanations and to the limits of what can realistically be known. Drawing on a wide variety of sources, 'al-Qaeda: From Global Network to Local Franchise' offers a penetrating insight into an organization which, for all its notoriety, is one of the least-understood of our time.

Ancient Religions, Modern Politics Dec 28 2020 Why Islam is more political and fundamentalist than other religions Why does Islam play a larger role in contemporary politics than other religions? Is there something about the Islamic heritage that makes Muslims more likely than adherents of other faiths to invoke it in their political life? If so, what is it? Ancient Religions, Modern Politics seeks to answer these questions by examining the roles of Islam, Hinduism, and Christianity in modern political life, placing special emphasis on the relevance—or irrelevance—of their heritages to today's social and political concerns. Michael Cook takes an in-depth, comparative look at political identity, social values, attitudes to warfare, views about the role of religion in various cultural domains, and conceptions of the polity. In all these fields he finds that the Islamic heritage offers richer resources for those engaged in current politics than either the Hindu or the Christian heritages. He uses this finding to explain the fact that, despite the existence of Hindu and Christian counterparts to some aspects of Islamism, the phenomenon as a whole is unique in the world today. The book also shows that fundamentalism—in the sense of a determination to return to the original sources of the religion—is politically more adaptive for Muslims than it is for Hindus or Christians. A sweeping comparative analysis by one of the world's leading scholars of premodern Islam, Ancient Religions, Modern Politics sheds important light on the relationship between the foundational texts of these three great religious traditions and the politics of their followers today.
