Presenting a mixed methods study conducted in a bilingual mathematics classroom in Zimbabwe, this text reveals the semantic pedagogical functions and linguistic forms of code-switching during STEM instruction. Code-Switching as a Pedagogical Tool in Bilingual Classrooms offers a detailed analysis of code-switching in the context of educational linguistics, and reveals ten major pedagogical techniques which illustrate how teachers use code-switches to engage students and provide guidance, clarification, discipline, and recaps during individual and whole-class interactions. Chapters highlight that code-switching can be used in a targeted manner to harness the cognitive potential of bilingual speakers and enhance instruction. Ultimately, the text identifies implications for teacher education, language policy, and educational leadership more broadly, and demonstrates intersections with key areas including functional, critical, and cultural literacy. This text will benefit researchers, academics, and educators with an interest in bilingualism, applied linguistics, and secondary education more broadly. Those specifically interested in multicultural education, sociolinguistics and educational policy will also benefit from this book. Models 655, 755, 756, 855, 856, 955 This 2017 Article IV Consultation highlights that over recent years, Tonga has enjoyed robust growth and macroeconomic stability. Growth continued to be strong at 2.7 percent in FY2017 following 3.4 percent in FY2016, supported by construction, agriculture, tourism, strong remittances, and strong private credit growth. Inflation spiked in FY2017 because of a new import tax and an increase in domestic food prices. The country's external position weakened slightly owing to construction-related imports, with reserves supported by strong remittances and donor aid. The outlook for the Tongan economy is favorable, despite external headwinds. Real GDP growth is projected at 3.4

percent in FY2018, driven by construction, agriculture, and tourism. Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years. The essay further discusses the English attraction to the Germanic style during the Victorian age, the development of the organ in mid-nineteenth-century England, and the ability of Czerny and Cocks's to appeal to a musical society rapt with the "king of instruments."
