Music and Capitalism Apr 01 2021 iTunes. Spotify. Pandora. With these brief words one can map the landscape of music today, but these aren't musicians, songs, or anything else actually musical—they are products and brands. In this book, Timothy D. Taylor explores just how pervasively capitalism has shaped music over the last few decades. Examining changes in the production, distribution, and consumption of music, he offers an incisive critique of the music industry's shift in focus from creativity to profits, as well as stories of those who are laboring to find and make musical meaning in the shadows of the mainstream cultural industries. Taylor explores everything from the branding of musicians to the globalization of music to the emergence of digital technologies in music production and consumption. Drawing on interviews with industry insiders, musicians, and indie label workers, he traces both the constricting forces of bottom-line economics and the revolutionary emergence of the affordable home studio, the global internet, and

the mp3 that have shaped music in different ways. A sophisticated analysis of how music is made, repurposed, advertised, sold, pirated, and consumed, Music and Capitalism is a must read for anyone who cares about what they are listening to, how, and why.

The No-nonsense Guide to Global Media Aug 05 2021 The power and influence of the mass media grows daily, crucially affecting the way all of us see and understand each other. The No-Nonsense Guide to Global Media introduces readers to the political economy of the major mediafilm, television, radio, recording, publishing and the Internet. Peter Steven looks at the ever greater concentration of ownership and at the convergence of technologies and media functions. At the same time, he emphasizes the diversity of local media production and media around the world. The media is more than the economics of ownership and the technology of production, he stresses; it is also audiences, in all their annoying and wonderful diversity.

Radio Empire Mar 20 2020 Initially created to counteract broadcasts from Nazi Germany, the BBC's Eastern Service became a cauldron of global modernism and an unlikely nexus of artistic exchange. Directed at an educated Indian audience, its programming provided remarkable moments: Listeners in India heard James Joyce reading from Finnegans Wake on the eve of independence, as well as the literary criticism of E. M. Forster and the works of Indian writers living in London. In Radio Empire, Daniel Ryan Morse demonstrates the significance of the Eastern Service for global Anglophone literature and literary broadcasting. He traces how modernist writers used radio to experiment with form and introduce postcolonial literature to global audiences. While innovative authors consciously sought to incorporate radio's formal features into the novel, literature also exerted a reciprocal and profound influence on twentieth-century broadcasting. Reading Joyce and Forster alongside Attia Hosain, Mulk Raj Anand, and Venu Chitale, Morse demonstrates how the need to appeal to listeners at the edges of the empire pushed the boundaries of literary work in London, inspired high-cultural broadcasting in England, and formed an invisible but influential global network. Adding a transnational perspective to scholarship on radio modernism, Radio Empire demonstrates how the history of broadcasting outside of Western Europe offers a new understanding of

the relationship between colonial center and periphery.

New Jazz Conceptions Jan 10 2022 New Jazz Conceptions: History, Theory, Practice is an edited collection that captures the cutting edge of British jazz studies in the early twenty-first century, highlighting the developing methodologies and growing interdisciplinary nature of the field. In particular, the collection breaks down barriers previously maintained between jazz historians, theorists and practitioners with an emphasis on

interrogating binaries of national/local and professional/amateur. Each of these essays questions popular narratives of jazz, casting fresh light on the cultural processes and economic circumstances which create the music. Subjects covered include Duke Ellington's relationship with the BBC, the impact of social media on jazz, a new view of the ban on visiting jazz musicians in interwar Britain, a study of Dave Brubeck as a transitional figure in the pages of Melody Maker and BBC2's Jazz 625, the issue of 'liveness' in Columbia's Ellington at Newport album, a musician and promoter's views of the relationship with audiences, a reflection on Philip Larkin, Kingsley Amis and Eric Hobsbawm as jazz critics, a musician's perspective on the oral and generational tradition of jazz in a British context, and a meditation on Alan Lomax's Mr. Jelly Roll, and what it tells us about cultural memory and historical narratives of jazz.

Maxwell's Guide to Authority Work Jul 16 2022 "Unidentified Flying Objects," not "UFOs" or "Flying Saucers" Authority work is the linchpin of the library catalog. As the author puts it, "Without authority control, the burden is placed on the user to think of all the possible forms a cataloger might have used to give access in the catalog to a given author or subject." If a subject is not sorted by its authorized heading, then the library and its users and staff are left without a system and ultimately the cost of an unsatisfied user. From one of the preeminent experts in the field, this is the step-by-step guide for ensuring that your library and staff are creating and maintaining authority records with the end user in mind. Comprehensive and definitive, Maxwell's Guide to Authority Work is a must-have. In this readable text, authority work is broken down to its most basic components so that you can trace and follow the preparation of a complete authority record. Helpful illustrations identify the key characteristics of good authority records, common acronyms are defined, and cross-references throughout reinforce material. Step-by-step, you'll learn how to: Form and record uniform access points Keep thorough and accurate records Share information in an environment of international databases and cooperative cataloging The authoritative tool for making certain a person, author, corporate body, organization, book, or other media is appropriately classified under its authority name, subject, and form, Maxwell's should be part of any library's toolbox.

Rubble Music Feb 11 2022 As the seat of Hitler's government, Berlin was the most frequently targeted city in Germany for Allied bombing campaigns during World War II. Air raids shelled celebrated monuments, left homes uninhabitable, and reduced much of

the city to nothing but rubble. After the war's end, this apocalyptic landscape captured the imagination of artists, filmmakers, and writers, who used the ruins to engage with themes of alienation, disillusionment, and moral ambiguity. In Rubble Music, Abby Anderton explores the classical music culture of postwar Berlin, analyzing archival documents, period sources, and musical scores to identify the sound of civilian suffering after urban catastrophe. Anderton reveals how rubble functioned as a literal, figurative, psychological, and sonic element by examining the resonances of trauma heard in the German musical repertoire after 1945. With detailed explorations of reconstituted orchestral ensembles, opera companies, and radio stations, as well as analyses of performances and compositions that were beyond the reach of the Allied occupiers, Anderton demonstrates how German musicians worked through, cleared away, or built over the debris and devastation of the war.
