Investigating Antecedents to the Development of Competence and Fulfillment Among Intellectually Gifted Adolescents Nov 30 2020 Discriminant analysis results indicated that the age-13 SAT (used to measure abilities) and Study of Values (used to measure preferences) assessments of 432 intellectually gifted adolescents each provided unique and valuable information to the prediction of type of college major completed 10 years after initial assessment. These positive findings add to growing support for the notion of early crystallization of preferences among the gifted and lend further credence to conjointly applying above-level ability and preference assessment in facilitating educational and early career planning among intellectually gifted adolescents.

Antecedents and Consequences of Digital Human Resource Management Feb 02 2021 During the last decades, a considerable amount of research has been directed towards explaining the concept of Digital Human Resource Management (DHRM). Yet, a holistic assessment of DHRM antecedents and consequences with respect to possible contextual contingencies is still missing. To this end, this thesis introduces a research framework

illuminating the multifaceted phenomenon of DHRM from various perspectives. An exploratory four-step meta-analytic structural equation modelling (E-MASEM) approach tailored to address the domain-specific challenges of DHRM is introduced and applied. Results identify 32 constructs associated with the DHRM usage phenomenon which are categorized into DHRM antecedents and DHRM consequences. Findings reveal that user perceptions, expectations, attitudes, and intentions are essential in predicting DHRM usage while HRM service quality and user satisfaction are found crucial in explaining other DHRM consequences. Further, practitioners are informed about the relative importance of factors for both facilitating DHRM adoption and measuring DHRM success. Lastly, this thesis also contributes to the MASEM methodology by outlining a new approach to summarize statistical inferences from multiple moderator tests.

Evaluation of the Antecedents of Cultural Competence Jun 06 2021 Purpose: The threefold purpose of this research is to identify the essential antecedents of cultural competence as identified by international nurse researchers, to compare the content of the extant cultural competence instruments to these antecedents and to potentially identify gaps in their conceptualization. A secondary aim of this research is to initiate validation of Harper's model of ethical multiculturalism. Conceptual Basis: The model of ethical multiculturalism depicts the attributes of ethical multiculturalism as the fulcrum of a balance between two ethical philosophies of fundamentalism and relativism. The attributes of moral

reasoning, beneficence/nonmaleficence, respect for persons and communities, and cultural competence form the pyramidal fulcrum. The antecedents form the base of the pyramid and include cultural awareness, culture knowledge, cultural sensitivity, cultural encounters, cultural skill and understanding of ethical principles. Methodology: An on-line Delphi method was conducted with 35 international nurse researchers identified through published research, university directories, and professional organizations. Consensus was reached after two rounds. Following the Delphi rounds, sixteen members of the expert panel participated in an on-line focus group to validate results of the Delphi and discuss cultural competence in the international arena. Findings: Eighty antecedents of cultural competence were identified. Focus group discussion validated findings of the Delphi. Consensual thematic analysis of the focus group transcripts resulted in six themes: chimerical, contact, contextual, collaboration, connections, and considering impact. The Transcultural Self-Efficacy Tool (TSET) contained the most antecedents identified by the expert panel. Conclusions: Cultural competence is a process, not an outcome, and must be considered from the perspective of the recipient of care or research participant. Nurses must strive to deliver culturally acceptable care. The model of ethical multiculturalism is revised to include cultural desire as an antecedent. Nurses must understand the impact of globalization on individual health and care delivery. Implications for Nursing: Further testing of cultural competence instruments is needed to determine the correlation of self-efficacy with behavior, self-assessment with client assessment, and cultural competence with client outcomes. In education, research is needed to determine the most effective methods of teaching cultural competence. Increased recruitment of minorities into nursing programs is warranted. In practice, nurses must be prepared to provide language assistance as

needed, recruitment and hiring of minorities must be increased, and minority thresholds must be used to determine cultural knowledge content for organizations.
 Antecedent Control Dec 20 2019 Promoting alternative approaches to behavioral support, this book explains both the theory and the methodology of antecedent control. Drawing on research and clinical experience, the authors--a group of distinguished experts in the field--explain how well-designed stimulus control procedures can lead to more diverse education, therapeutic, and habilitation options than can traditional reactive methods. Addressing behavior disorders commonly associated with a range of diagnoses, syndromes, and disabilities, the assessment and treatment techniques in this book are effective for both children and adults. A must-read for researchers, clinicians, consultants, behavior specialists, special educators, and psychologists.
 The Routledge Handbook of the Global Sixties May 25 2020 'This extraordinary collection is a game-changer. Featuring the cutting-edge work of over forty scholars from across the globe, The Routledge Handbook of the Global Sixties is breathtaking in its range, incisive in analyses, and revolutionary in method and evidence. Here, fifty years after that iconic "1968," Western Europe and North America are finally de-centered, if not provincialized, and we have the basis for a complete remapping, a thorough reinterpretation of the "Sixties."' —Jean Allman, J.H. Hexter Professor in the Humanities; Director, Center for the Humanities, Washington University in St. Louis 'This is a landmark achievement. It represents the most comprehensive effort to date to map out the myriad constitutive elements of the "Global Sixties" as a field of knowledge and inquiry. Richly illustrated and meticulously curated, this collection purposefully "provincializes" the United States and Western Europe while shifting the loci of interpretation to Africa, the Middle East, Asia, and Latin America. It will become both a benchmark reference text

*for instructors and a gateway to future historical research.'

'This important and wide-ranging volume de-centers West-
focused histories of the 1960s. It opens up fresh and vital
ground for research and teaching on Third, Second, and
First World transnationalism(s), and the many complex
connections, tensions, and histories involved.' —John
Chalcraft, Professor of Middle East History and Politics,
Department of Government, London School of Economics
and Political Science 'This book globalizes the study of the
1960s better than any other publication. The authors
stretch the standard narrative to include regions and
actors long neglected. This new geography of the 1960s
changes how we understand the broader transformations
surrounding protest, war, race, feminism, and other
themes. The global 1960s described by the authors is more
inclusive and relevant for our current day. This book will
influence all future research and teaching about the
postwar world.' —Jeremi Suri, Mack Brown Distinguished
Chair for Leadership in Global Affairs; Professor of Public
Affairs and History, The University of Texas at Austin As
the fiftieth anniversary of 1968 approaches, this book
reassesses the global causes, themes, forms, and legacies
of that tumultuous period. While existing scholarship
continues to largely concentrate on the US and Western
Europe, this volume will focus on Asia, Africa, the Middle
East, and Eastern Europe. International scholars from
diverse disciplinary backgrounds explore the global sixties
through the prism of topics that range from the economy,
decolonization, and higher education, to forms of protest,
transnational relations, and the politics of memory.*

Applied Behavior Analysis Treatment of Violence and Aggression in Persons with Neurodevelopmental Disabilities Jun 18 2022 This book focuses on applied behavior analysis (ABA) treatment of violence and aggression in persons with neurodevelopmental disabilities. It details ABA theory and concepts leading to empirical treatment procedures that can be implemented successfully across diverse treatment settings. Further, the book examines contemporary approaches to functional behavioral assessment (FBA) and functional analysis (FA) in determining the environmental conditions responsible for violence and aggression. In addition, the volume describes several evidence-supported treatment procedures that encompass antecedent-control, contingency management, cognitive-behavior therapy, and physical intervention components. It addresses effective strategies for training and supervising care providers, including behavioral skills training (BST), posttraining performance management, and mindfulness. Finally, the book presents recommendations that guide effective and socially valid research-to-practice translation. Applied Behavior Analysis Treatment of Violence and Aggression in Persons with Neurodevelopmental Disabilities is an essential resource for researchers, clinicians/therapists, and upper-level undergraduate and graduate students in forensic psychology, public health, criminology/criminal justice, and behavioral therapy and rehabilitation.

Antecedent Predictors of a "full Range" of Leadership and Management Styles Oct 18 2019 "This report examines relationships between the leadership of entering leaders

and antecedent measures of personality, ability, temperament, interpersonal style, experience, and physical fitness. The data described a sample of cadets/students during their first 2 1/2 years of education and military training at a state military college. The primary purpose was to track longitudinally leader development and emergence and, in this reporting of the data, to identify antecedents which differentiate cadets characterized by a transformational leadership style from those cadets more characterized by transactional styles of leadership. Results suggested potential discriminators, but more definitive trends will possibly appear as the cadets progress in education and transition into positions with greater leadership discretion."--DTIC.

Does classroom environment affect student learning? Do school environments affect teacher job satisfaction? What impact does a new curriculum or new teaching methods have on a classroom environment? Indeed, what are the determinants of classroom or school environments? Although classroom or school environment is a somewhat subtle concept, remarkable progress has been made in researching its evaluation and its antecedents and consequences. Educational Environments considers the major thrusts of research over the last two decades with a general overview and a look at particular research programmes and specific research studies. Contemporary studies from around the world demonstrate the merits of combining qualitative and quantitative methods within the same study, linking classroom, school and home environments, and

incorporating educational environment ideas into school psychology and teacher education programmes. Applied Behavior Analysis Mar 15 2022 APPLIED BEHAVIOR ANALYSIS Applied Behavior Analysis: Principles and Procedures for Modifying Behavior will serve as a resource for students who plan to become behavior analysts to design and conduct interventions to change clients' behaviors. Author, Edward P. Sarafino provides an understanding of the fundamental techniques of applied behavior analysis by presenting its concepts and procedures in a logical sequence and giving clear definitions and examples of each technique. This book will guide readers to learn: how to identify and define the behavior to be changed and how a response is determined by its antecedents and consequences, usable, practical skills by specifically stating the purpose of each technique, describing how it is carried out, and presenting guidelines and tips to maximize its effectiveness, why and how to design a program to change a behavioral deficit or excess by conducting a functional assessment and then selecting and combining techniques that can be directed at the behavior itself and its antecedents and consequences, and, to illustrate why and how to collect and analyze data. Here is what reviewers have said about Applied Behavior Analysis: Principles and Procedures for Modifying Behavior: "Overall, this textbook provides a thorough, concise, and engaging introduction to applied behavior analysis." Rafael Bejarano, Henderson State University This textbook "... provides good, basic explanations of concepts in Applied Behavior Analysis that are easy to grasp for undergraduate students." Lisa Gurdin, Northeastern University This textbook is, "Comprehensive. Easily accessible" and it has " Great illustrations and examples." Joel Kevin Thompson, University of Southern Florida To learn more about Applied Behavior Analysis: Principles and Procedures for Modifying Behavior, please visit us at www.wiley.com/college/sarafino.

associations to employ evidence-based practices. Also, there is an appreciation for the usefulness of behavioral principles in treating clients with very severe communicative disorders, such as autism, apraxia, and dysfluency. This is evidenced by the development of the field of applied behavior analysis and the growing numbers of board certified behavior analysts (BCBA), with whom SLPs may be called upon to collaborate. Behavioral Principles in Communicative Disorders is primarily designed for practicing speech-language pathologists looking for detailed descriptions of evidence-based treatment procedures, as well as professors and students in university programs in communicative disorders. However, professionals in other fields, such as applied behavior analysis and special education, will also find this to be a highly useful text.

Antecedents to Disposition to Trust Apr 16 2022 The study investigated the antecedents to disposition to trust with regard to the Accelerated Reader program. The areas considered were teachers' experience, teachers' peer experience, teachers' peer support, gender, and age. The population for this study consisted of teachers who used Accelerated Reader from four school districts in Louisiana. The total number of teachers who were given the survey was 417, and the number of teachers who completed the survey was 301, resulting in a response rate of 72.2%. In this study, 6 research questions were addressed. The first question asked whether a statistically significant relationship exists between teachers' experience in using electronic education tools and their disposition to trust Accelerated Reader technology to facilitate reading instruction. The second question asked if a statistically significant relationship exists between teachers' peer experience and their disposition to trust Accelerated Reader software technology to improve reading instruction. The third question asked if a statistically significant

relationship exists between teachers' peer support and their disposition to trust that Accelerated Reader software technology improves reading instruction. The fourth question asked if a relationship exists between teachers' gender and their disposition to trust that the Accelerated Reader technology will improve reading instruction. The fifth research question asked if a statistically significant relationship exists between teachers' age and their disposition to trust that the Accelerated Reader technology will improve reading instruction. Finally, the sixth research question asked if teachers trust that Accelerated Reader technology is perceived as effective in helping to improve reading instruction. The results found that teachers' experience, teachers' peer experience, teachers' peer support, and gender were all antecedents that had meaningful statistical relationships with disposition to trust. Gender was found to affect only 1% of the overall variance of disposition to trust when all five variables were examined together; however, findings indicated that females had less disposition to trust than males. Multiple age brackets were found to be insignificant.

Neuropsychological Assessment and Intervention for Childhood and Adolescent Disorders Jul 27 2020 A compelling and compassionate case study approach to a broad range of neuropsychological disorders Neuropsychological Assessment and Intervention for Childhood and Adolescent Disorders focuses on the neuropsychological assessment and evidence-based practices available for assessing and treating children living with the etiological and neurological components of various disorders. Each chapter provides one or more case studies along with helpful background information, assessment results, and recommendations based on assessment data. Bridging science and practice, the book reviews the scientific literature, research on clinical implications, and evidence-based treatment of such disorders as: Dyslexia and Dyscalculia Specific Language

Impairment/Dysphasia Autism Spectrum Disorders Attention-Deficit/Hyperactivity Disorder Tourette Syndrome Traumatic Brain Injury Childhood Cancer Epilepsy Cerebrovascular Disease Low Birth Weight Environmental Toxin Exposure Neurotoxins, Pregnancy, and Subsequent Disorders Chromosomal Anomalies Neurocutaneous Disorders Metabolic Disorders Each case study complements the content of each chapter by illustrating how the assessment process can inform intervention efforts for children. In addition, the cases humanize the effects of various disorders and demonstrate the usefulness of neuropsychological information in treatment and intervention planning, especially within children's educational and social contexts.

Teaching and Behavior Support for Children and Adults with Autism Spectrum Disorder Mar 03 2021 The number of children diagnosed with autism has increased dramatically in the last decade, and a growing number of behavior analysts, psychologists, educators, and speech pathologists-to name a few-are just starting to regularly treat individuals with autism. Children and adults with autism spectrum disorder (ASD) require specialized instruction and behavior support to teach them critical skills and establish a meaningful quality of life. However, these objectives can only be achieved if professional and paraprofessional service providers have access to the most effective evidence-based and empirically supported methods for teaching children with autism. Similarly, practitioners must know about effective intervention methods that can be implemented to reduce and eliminate problem behaviors frequently displayed by people who have ASD. This guide is an indispensible asset, appropriate for any behavioral specialist, on all aspects of this increasingly prevalent disorder. Teaching and Behavior Support for Children and Adults with Autism Spectrum Disorder brings together contributed chapters on assessment, instruction, and behavioral intervention procedures unique to the

autism population. Each chapter covers a single topic according to a uniform format, which will ease comprehension and facilitate procedural adaptation in "real world" settings such as school, home, and the community. Usable advice and methods for teaching difficult skills, such as self-care, verbal language, and communication, are provided. Authored by recognized experts, the concise and readable chapters also feature forms, illustrations, summary tables, and resource lists to further guide practitioners in selecting "best practice" methods. Taking into account specific settings, different age groups, and practitioner experience, this book will serve as a resource for educators, psychologists, and behavior specialists in the field of autism education and treatment, and as an educational tool for those enrolled in university classes training to become practitioners.

Sexual Offending Feb 26 2023 This expert reference provides a broad, comprehensive review of the major domains of sexual offending. Beginning with an integrated etiological model of sexual offending, chapters follow

addressing the primary predisposing conditions related to sexual offending (e.g. pedophilic, hebephilic, paraphilic rape and non-contact paraphilic disorders, hyper sexuality and personality factors). In addition, special subgroups of sexual offenders (females, youth and the intellectually disable) are considered. Both broad and specific perspectives on the assessment of sexual offenders are provided. Overviews are offered of clinical and forensic evaluations of such offenders and the utility of structured psychological assessment. A novel conceptual model of risk assessment is proposed. More specifically, each of the primary approaches or instruments related to risk assessment of sexual offending are addressed: the Static risk assessment measures, the Sex Offender Risk Appraisal Guide, structured professional judgment, and the varied measures of dynamic or criminogenic needs assessment. Finally, multiple aspects of management of sexual offenders are discussed including models of psychosocial treatment, the question of the effectiveness of such treatment, biological interventions, civil commitment, circles of support, and the containment approach to community management. Chapters are authored by both prominent experts and experienced professionals for a breadth of perspective. Among the topics covered: Pedophilic, Hebephilic, Rape Paraphilic Disorders and the variety of Non Contact sexual offending conditions Personality, related conditions, & their association with sexual offending: motivators and disinhibition in context. Disorders of hyper sexuality. Assessments of sexual offenders, including the role of psychological testing, clinical & interview approaches, as well as forensic evaluations Conceptual models of risk assessment & discussion of specific static, dynamic & structured clinical risk assessment approaches Models of & reviews of treatment outcome with sexual offenders, including psychotherapy, psychopharmacology and castration, the containment approach, civil commitment & circles of

support Overview of public policy issues & an evidence-based perspective on sex offender registration and residential restrictions. This breadth of material in Sexual Offenders will help practitioners gain multiple levels of clinical insight as well as giving them up-to-date practical tools and techniques for working with this problematic class of individuals.

Economic News Jan 13 2022 This Element provides a concise review of the existing literature on content, antecedents and consequences of economic news coverage. It tests and refines prominent assumptions and hypotheses in this area. Relying on communication science theories such as framing, news values and media dependency theories, we first outline and explain how media cover the economy. Additionally, it demonstrates that coverage has a fundamental impact above and beyond the state of the economy, both on economic perceptions and political attitudes of citizens, as well as on political decision makers and media reputation of a wide variety of organizations.

Handbook of Research in Pediatric and Clinical Child Psychology Jan 21 2020 The professional development of researchers is critical for the future development of the fields of pediatric and clinical child psychology. In order to conduct research in pediatric and clinical child psychology,

researchers need to work with a wide range of populations and master an increasingly wide range of skills, many of which are either not formally taught or considered in sufficient depth in clinical training. Such skills include the development of resources for research by writing grants to government agencies and foundations; skills in preparing research for publications concerning original research, review articles, or case reports; scien tific presentation skills; the ability to review and edit scientific manuscripts; and to implement and manage research in applied settings. Moreover, the increasing complexity of research in pediatric and clinical child psychology requires success ful researchers in these fields to develop their expertise with a wide range of new specialized methodologies, data analytic methods, models of data analysis, and methods of assessment. Finally, to enhance the relevance of their research to practice, researchers in pediatric and clinical child psychology need to integrate their work with clinical service delivery programs that are based on empirical research. The necessity to train researchers in pediatric and clinical child psychology in such multifaceted knowledge and skills places extraordinary burdens on profes sional training programs. Professional researchers in pediatric and child clinical psychology also are challenged to develop new knowledge and skills through continuing education and faculty development programs.
