Effective Cost Cutting in Asia Mar 31 2021 The days of cheap raw materials and energy sources are gone. Suppliers will demand price increases due to the rising costs of energy and materials. This book describes how your purchasing department is able to gain (more) profit for your company and includes new ideas for successful purchasing and supplier development in Asia. The author discusses how to reduce costs in productive (BOM) and non-productive materials (NPMs) and how to calculate product and tool costs. As well, the book shows ways to negotiate your results with your suppliers in Asia and build an effective system of supplier relationship management.

Tom Clancy Enemy Contact Sep 17 2022 Jack Ryan, Jr.'s race to stop an international criminal conspiracy is intertwined with the fate of an old friend in this blistering entry in the #1 New York Times bestselling series. The CIA's deepest secrets are being given away for a larger agenda that will undermine the entire Western intelligence community. Director of National Intelligence Mary Pat Foley wants it stopped but doesn't know who, how or why. Jack Ryan, Jr., is dispatched to Poland on a different mission. The clues are thin, and the sketchy trail dead ends in a harrowing fight from which he barely escapes with his life. If that's not bad enough, Jack gets more tragic news. An old friend, who's dying from cancer, has one final request for Jack. It seems simple enough, but before it's done, Jack will find himself alone, his life hanging by a thread. If he survives, he'll be one step closer to finding the shadowy figure behind the CIA leak and its true purpose, but in the process, he'll challenge the world's most dangerous criminal syndicate with devastating consequences.

Rehabilitation of Prisoners Feb 10 2022 The Committee's report examines the rehabilitation of offenders, looking in particular at the effectiveness of prisons in reducing re-offending through rehabilitation, given the problems of overcrowded conditions. Issues discussed include: recent government initiatives; the provision and adequacy of education, vocational training and paid work programmes; offending behaviour and cognitive skills programmes; mental healthcare provision and drug treatment services; and rehabilitation issues related to certain groups of prisoners, such as remand and short-term prisoners, women, young offenders, minority ethnic and religious groups. The Committee argues that the best way of reducing re-offending is to ensure that prisoners on their release have the ability to get into work and a home to go to, and it explores ways of delivering an effective rehabilitation strategy which reintegrates offenders into society by providing opportunities and assistance which address the differing needs of prisoners and their backgrounds.

CUCKOO'S EGG Apr 19 2020 Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

Designing the Digital Transformation Mar 11 2022 This book constitutes the proceedings of the 12th International Conference on Design Science Research in Information Systems and Technology, DESRIST 2017, held in May/June 2017 in Karlsruhe, Germany. The 25 full and 11 short papers presented in this volume were carefully reviewed and selected from 66 full and 19 short papers. The contributions are organized in topical sections named: DSR in business process management; DSR in human computer interaction; DSR in data science and business analytics; DSR in service science; methodological contributions; domain-specific DSR applications; emerging themes and new ideas; and products and prototypes.

Advances in Production Management Systems: Innovative Production Management Towards Sustainable Growth Jul 03 2021

The two volumes IFIP AICT 459 and 460 constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2015, held in Tokyo, Japan, in September 2015. The 163 revised full papers were carefully reviewed and selected from 185 submissions. They are organized in the following topical sections: collaborative networks; globalization and production management; knowledge based production management; project management, engineering management, and quality management; sustainability and production management; co-creating sustainable business processes and ecosystems; open cloud computing architecture for smart manufacturing and cyber physical production systems; the practitioner's view on "innovative production management towards sustainable growth"; the role of additive manufacturing in value chain reconfiguration and sustainability; operations management in engineer-to-order manufacturing; lean production; sustainable system design for green products; cloud-based manufacturing; ontology-aided production - towards open and knowledge-driven planning and control; product-service lifecycle management: knowledge-driven innovation and social implications; and service engineering.

Freedom from Necessity Feb 22 2023 This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

Achieving Brand Loyalty in China through After-Sales Services Dec 16 2019 This paper provides a guideline for how the entire process chain of automotive after-sales services could be researched in China. In addition, Schwartz's individual level value theory is introduced as a beneficial operationalisation approach to cultural marketing. So, values are modelled as exogenous variables in order to show which ones are

really causal. A total of 301 Chinese workshop customers were surveyed to assess the critical success factors of after-sales services via partial least squares structural equation modelling. After-sales services have become very important in the automobile industry. However, this area has not been sufficiently researched, particularly with regard to China, the most important car market globally.

LABOR ARBITRATION REPORTS Nov 26 2020

Imprisonment Jan 09 2022 This book explores the main purposes of imprisonment around the world, including punishment, deterrence, rehabilitation, and public safety. It looks at the role of sentencing: Do life sentences violate human rights? How are juvenile offenders treated? Are mandatory sentences effective? Readers will examine the treatment of prisoners and prison conditions like overcrowding, gang activity, sexual abuse and disease, as well as the unique plight of political and religious prisoners. Essay sources include the Council of Europe, Catholic Bishops of New Zealand, House of Commons Home Affairs Committee, Just Detention International, and Human Rights Watch.

In the Service of Aeolus Jan 21 2023 Peter Foerthmann has spent his life in the service of Aeolus, the Keeper of the Winds. He learned to harness the power of the wind first as a sailor and then as the man behind the Windpilot windvane self-steering company. The winds of fortune have by turns favoured (his serendipitous meeting with Windpilot founder John Adam, for example) and tormented (numerous legal entanglements being the most prominent example) him without ever managing to blow him entirely off course - a course that stretches to the horizon and beyond, where sailing dreams become reality (at least for those with the right transom ornament). This book presents the recollections of a self-taught original who, heedless of convention and relying strictly on his own internal compass, has developed a unique understanding of social interaction among sailors, who have rewarded him in turn by spreading the word about his products effectively enough to make Windpilot the world market leader for windvane self-steering systems. Building up the company and developing a product that enables sailors the world over to enjoy long passages freed from the need to steer continuously has given Peter an all but unparalleled insight into blue-water sailing and an expertise in various related areas that he has shared in several highly regarded specialist publications. A compulsive writer, Peter takes as much pleasure in choosing his words as he does in telling his story, the story of how he swapped a boat for the idea that became his life, how he went from a traditional workshop-based operation building everything by hand to what must surely be one of the world's smallest state-of-the-art industrial manufacturing companies and, most importantly of all for him, how he has managed to defend and maintain his independence both commercially and socially by sticking to his principles - fairness, respect, empathy - and learning, not without incident, to choose his friends wisely. Above all, this is the story of half a century in the windvane self-steering business, a story that - Aeolus willing - still has a long way to run.

Do-It-Yourself High Performance Car Mods May 21 2020 A Step-by-Step Guide to Building Your Dream Hot Rod Inside and Out! Get revved up! Everything you need to know about building your dream hot rod is inside this book. You now have at your disposal the basic automotive techniques and tools necessary to install any modification to your car. Here's the fastest and easiest way to get started! Do-It-Yourself High-Performance Car Mods is designed to help you modify cars and light trucks for improved performance. While there are many books on individual systems on a car, this practical step-by-step guide provides you with a thorough working knowledge of ALL the systems in a single resource. Automotive journalist and experienced engineer Matt Cramer has created an invaluable reference for readers regardless of age or experience. Whether you're a hobbyist new to the world of performance cars or a veteran car enthusiast looking to take the next step, you will become better equipped to drive off in the car of your dreams. There's never been a simpler, more practical approach to modifying cars and light trucks, so you can do-it-yourself--and ultimately end up in the winner's circle! Do-It-Yourself High-Performance Car Mods includes valuable information on: How car systems work Simple ways to improve performance Getting more power out of your engine How to find reliable sources Separating marketing hype from reality Adjusting the engine

components and controls for best performance How improving one area may impede another

Multiple Approaches to Intelligent Systems Dec 20 2022 We never create anything, We discover and reproduce. The Twelfth International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems has a distinguished theme. It is concerned with bridging the gap between the academic and the industrial worlds of Artificial Intelligence (AI) and Expert Systems. The academic world is mainly concerned with discovering new algorithms, approaches, and methodologies; however, the industrial world is mainly driven by profits, and concerned with producing new products or solving customers' problems. Ten years ago, the artificial intelligence research gap between academia and industry was very broad. Recently, this gap has been narrowed by the emergence of new fields and new joint research strategies in academia. Among the new fields which contributed to the academic-industrial convergence are knowledge representation, machine learning, searching, reasoning, distributed AI, neural networks, data mining, intelligent agents, robotics, pattern recognition, vision, applications of expert systems, and others. It is worth noting that the end results of research in these fields are usually products rather than empirical analyses and theoretical proofs. Applications of such technologies have found great success in many domains including fraud detection, internet service, banking, credit risk and assessment, telecommunication, etc. Progress in these areas has encouraged the leading corporations to institute research funding programs for academic institutes. Others have their own research laboratories, some of which produce state of the art research.
