Communities and

Organizations Feb 22 2023

Considers how diverse types of communities influence organizations, as well as the associated benefit of developing an accounting for community processes in organizational theory. This title focuses on social proximity and networks that has characterized the work on communities.

Managing Health Promotion

Sep 24 2020 This is a concise, practical and timely guide to the improved management of health promotion. It includes information on systems for quality improvement and audit of health promotion. It describes a developmental approach to intervention based on the values and processes of individual autonomy, democracy, mutual empowerment and community participation. Emphasis is placed both on how to create organizations and conditions which enhance health and quality of life, and on how to empower individuals and forge relationships through which everyone makes health gains. Recent research and evaluation is discussed in a practical way including how best to help people change their lifestyles and how to extend our outreach so that hard-to-reach groups become active participants. Organization in Open Source

Communities Aug 16 2022 This book contributes new insights into the organization of free/open source (F/OS) software communities by examining the links between learning, division of labour and commercialization, demonstrating the need for a synthesis of work on both community organization and cooperation to understand F/OS community dynamics. These aspects are examined in the light of detailed case studies of the GNOME and KDE projects. This book offers an innovative theoretical framework, a critical assessment of various methodologies for examining the organisation of F/OS communities, and a typology of commercial involvement in F/OS. The analysis reveals the diversity and evolution of F/OS communities and their connections with other socio-economic networks and institutional practices. The insights afforded by the book have implications for future research and the design and implementation of open source efforts.

Considers how diverse types of communities influence organizations, as well as the associated benefit of developing an accounting for

community processes in organizational theory. This title focuses on social proximity and networks that has characterized the work on communities.

Cultivating Communities of Practice

Mar 11 2022 Today's marketplace is fueled by knowledge. Yet organizing systematically to leverage knowledge remains a challenge. Leading companies have discovered that technology is not enough, and that cultivating communities of practice is the keystone of an effective knowledge strategy. Communities of practice come together around common interests and expertise-whether they consist of first-line managers or customer service representatives, neurosurgeons or software programmers, city managers or home-improvement amateurs. They create, share, and apply knowledge within and across the boundaries of teams, business units, and even entire companies-providing a concrete path toward creating a true knowledge organization. In *Cultivating Communities of Practice*, Etienne Wenger, Richard McDermott, and William M. Snyder argue that while communities form naturally, organizations need to become more proactive and systematic about developing and integrating them into their strategy. This book provides

practical models and methods for stewarding these communities to reach their full potential-without squelching the inner drive that makes them so valuable. Through in-depth cases from firms such as DaimlerChrysler, McKinsey & Company, Shell, and the World Bank, the authors demonstrate how communities of practice can be leveraged to drive overall company strategy, generate new business opportunities, tie personal development to corporate goals, transfer best practices, and recruit and retain top talent. They define the unique features of these communities and outline principles for nurturing their essential elements. They provide guidelines to support communities of practice through their major stages of development, address the potential downsides of communities, and discuss the specific challenges of distributed communities. And they show how to recognize the value created by communities of practice and how to build a corporate knowledge strategy around them. Essential reading for any leader in today's knowledge economy, this is the definitive guide to developing communities of practice for the benefit-and long-term success-of organizations and the individuals who work in them. Etienne Wenger is a renowned expert and consultant on knowledge management and communities of practice in San Juan, California. Richard McDermott is a leading expert of organization and community development in Boulder,

Colorado. William M. Snyder is a founding partner of Social Capital Group, in Cambridge, Massachusetts.

Future Search Dec 16 2019 This text explores a new way for organizations and communities to apply global thinking and democratic values to achieve rapid whole systems improvement.

The Applied Improvisation Mindset Feb 16 2020 How can the practice of improvisation become the lens through which we view the world? The Applied Improvisation Mindset takes readers deep into the maturing field of Applied Improvisation (AI), with stories of 18 practitioners from five countries who embrace an improvisation mindset to create a more collaborative, equitable, sustainable, and joyous world. Myriad organizations have discovered how the mindset and skills applied by great improvisers onstage can reveal emergent, generative ways of interacting with others offstage. With case studies on developing presentation skills, reducing anxiety in teens, or preparing climate risk managers across the globe for the challenges ahead, this second volume serves as a valuable resource for both experienced and new AI facilitators. It is a primer for higher education and K-12 faculty combatting traditional teaching limitations and a practical "how to" for theatre practitioners, artists, educators, or anyone seeking to transform their organizations and communities. Encyclopedia of Communities of Practice in Information and

Knowledge Management Nov 14 2019 "This encyclopedia will give readers insight on how other organizations have tackled the necessary means of sharing knowledge across communities and functions" -- Provided by publisher.

Competitive Advantage Oct 06 2021 "This book provides a sound understanding of the managerial implications of communities of practice as well as their opportunities and limits for knowledge management"--nota del editor.

Controversial Issues in Communities and Organizations Aug 24 2020 **Social Work Practice with Groups, Communities, and Organizations** Nov 19 2022 A solid, theory-to-practice guide to contemporary mezzo and macro social work Written by a renowned team of scholars, *Social Work Practice with Groups, Communities, and Organizations* focuses on the contemporary theory and practice of social work. Each chapter delves deeply into the key theoretical considerations surrounding a particular practice area, exploring the clinical implications of each. Spanning the full range of both mezzo and macro practice areas, the authors thoroughly look at the assessment of and interventions with group, community, organizational, and institutional settings. The most authoritative book in this field, *Social Work Practice with Groups, Communities, and*

Organizations features: A focus on evidence-based approaches to assessment and intervention for each practice area discussed Comprehensive coverage of the most important new and emerging practice technologies in mezzo and macro social work Current and emerging demographic, social, political, and economic trends affecting mezzo and macro practice An array of pedagogical aids, including Key Terms, Review Questions for Critical Thinking, and Online Resources Content closely aligned with social work accreditation standards (EPAS) Providing a solid review of the entire scope of contemporary mezzo and macro social work practice, *Social Work Practice with Groups, Communities, and Organizations* is both an indispensable educational text for students and a valuable working resource for practitioners who work with groups, communities, and organizations of all sizes.

Knowledge and

Communities Mar 31 2021

Knowledge and Communities is the first book dedicated to a major new knowledge management topic.

"Communities of Practice" are cross-organizational groups of people sharing knowledge, solving common problems, and exchanging insights and frustrations. *Knowledge and Communities*, a collection of authoritative articles, describes the dynamics of these groups and explains how they enable organizational knowledge to be creating, shared, and applied. The book teaches how organizations can empower

both traditional and on-line communities and make them a cornerstone of a general knowledge management strategy. Readers will learn how communities can help unify an organization and its external stakeholders, such as customers and suppliers, and how they can critically support an e-commerce strategy. *Knowledge and Communities* will help readers understand a primary vehicle for building an organization's social capital and competitive advantage.

Organizations at the Intersections of Place: Relationships, Principles, and Dimensions of Place Building Jan 29 2021

Place is more than a location for an organization or community. Place is the seam of connectedness and intersections between an organization and its community. In this book, the editors have gathered research from across the globe to further explore the many forms of this connecting and intersecting seam of PLACE. This interdisciplinary concept connects geography, human geography, ecological and environmental psychology, and many others in the academic and applied fields. Thomas and Banning looked at the 13 years of research on how organizations valued the places where they reside and discovered that academic and practitioners alike were looking for a different perspective on how organizations relate to their communities. There was great interest in seeing how place can and should play an important role in the strategic

relationships organizations have with their communities, their clients, and their employees. The editors demonstrate in this book that place is not just a location, but connections and intersections with important community structures, values, and social responsibility. This book lays out the three principles of place building, the four types of place builders, and the five place dimensions that provide the conceptual framework needed to explore the complexities of the connections and intersections of organizational place building. For additional information regarding the Organizational Place Building Inventory, visit our website at www.placebuilding.net or email David Thomas at david@placebuilding.net

Organizational Imaginaries Dec 08 2021

This volume explores an expansive array of organizational imaginaries, or conceptions of organizational possibilities, with a focus on collectivist-democratic organizations, to showcase how organizations can ultimately support and serve broader communities.

Digital Social Work Jan 21 2023

"In a digitally powered society, social workers, are challenged to embrace new interventions and enhance existing strategies in order to effectively promote social justice. The cases in this volume present engaging examples of technology tools in use across micro, mezzo and macro practice, illuminating the knowledge, skills, and values required of those who

practice social work 2.0"--
Provided by publisher.

Brooks/Cole Empowerment Series: Generalist Practice with Organizations and Communities Mar 19 2020

EMPOWERMENT SERIES: GENERALIST PRACTICE WITH ORGANIZATIONS AND COMMUNITIES, 6th Edition is designed to help students better understand the dynamics of macro practice, and develop the competencies and practice behaviors required by the Council on Social Work Education's (CSWE) latest Educational Policy and Accreditation Standards (EPAS). Authors Karen Kirst-Ashman and Grafton Hull are adept at creating interesting, realistic cases and practical examples that are skillfully woven into the main text. In clear and accessible writing, the authors emphasize the practical skills students will need to work effectively in the area of macro practice--providing leadership, working with supervisors, managing conflict, working with the media, using new technological advances, fundraising, grant writing, and managing stress. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Generalist Practice with Organizations and

Communities May 13 2022 This readable and practical text applies the generalist practice model to social work with larger systems including organizations, neighborhoods, and communities, and

emphasizes how macro, micro, and mezzo skills are inter-linked and how they are used every day practice. The authors clearly define the step-by-step processes for contemplating and initializing macro change in organizations and communities, while integrating issues such as values and ethics, populations-at-risk, social and economic justice, and diverse perspectives. The examples, practical applications, highlights, pictures, and diagrams make the material engaging and relevant. Significant issues pertinent to macro practice, including working with the media and courts, fundraising, grant writing, and resolving ethical dilemmas, are also addressed.

Doing it Together Nov 26 2020

In Chicago, a patchwork city of culturally distinct neighborhoods, arts organizations seek to define and articulate the communities they serve in order to specify their programming and more clearly evaluate outcomes. Community-engaged arts organizations in particular rely on a relationship with their target audience as a central part of their purpose. This study examines how these organizations are fostering healthy and effective relationships with the communities they serve. To form a foundation for evaluating the effectiveness of community-engaged arts organizations, this study first offers some clarifying perspectives on the often ambiguous concepts, community and relationships. It

brings Anthony Cohen's Symbolic Construction of Community into conversation with W. Barnett Pearce's communication theory, Coordinated Management of Meaning. Applied together, these theories suggest that relationships with communities exist in between collective identities and individual embodied human interactions. The study then provides insights from Black queer feminism on how both collectivity and individuality might be brought into practice through collaboration, a holistic view of community members, and accountability to the most marginalized among the community. The study illustrates each of these theories through brief examinations of Jane Addams Hull-House Museum and Territory NFP, two organizations in Chicago that are thoughtfully building community relationships. The central case study brings all of these theories together in an examination of alt_ Chicago, a community-engaged arts organization that is establishing itself in the Austin neighborhood of Chicago and rapidly gaining momentum in Chicago's art and nonprofit landscape. Finally, it provides suggestions for how arts organizations can apply these theoretical perspectives as lenses for considering their own practices and fostering healthier, more effective relationships with their communities.

The UNESCO Story; a Resource and Action Booklet for Organizations

and Communities Feb 10 2022

Communities Of Innovation: How Organizations Harness Collective Creativity And Build Resilience Jan 09 2022

This book describes the important role played by communities in innovation processes and how organizations can benefit from it. A community brings together individuals who share a common passion for a given area of knowledge and can contribute to innovation at different levels: capitalization of good practices, problem solving, sharing of expertise, or development of new and creative ideas. The literature has progressively identified many variants of communities such as communities of practice, epistemic communities, communities of interest, virtual communities, etc. These forms of communities differ regarding the type of the specialized activities of knowledge on which they focus. As practitioners and academics increasingly emphasized the needs of collaborative approaches in innovation, they progressively challenged the traditional idea that innovation is mainly generated by hierarchical corporate departments and highlighted the active role that communities play in innovation processes. The aim of this book is to shed light, using multiple examples, on the proactive and fundamental role of communities in the new innovation practices of organizations.

Generalist Practice with Organizations and

Communities Jun 02 2021

BROOKS/COLE

EMPOWERMENT SERIES: GENERALIST PRACTICE WITH ORGANIZATIONS AND

COMMUNITIES, International Edition is designed to help students better understand the dynamics of generalist practice with communities and organizations, and develop the competencies and practice behaviors required by the Council on Social Work Education's (CSWE) latest Educational Policy and Accreditation Standards (EPAS). Authors Karen Kirst-Ashman and Grafton Hull are adept at creating interesting, realistic cases and practical examples that are skillfully woven into the main text. At the heart of the book are two original models, illustrated by a running case study-- Prepare (the assessment and planning phases of planned change) and Imagine (the implementation stage). These models form useful frameworks for effective macro social work practice. In clear and accessible writing, the authors emphasize the practical skills students will need to work effectively in the area of macro practice-- providing leadership, working with supervisors, managing conflict, working with the media, using new technological advances, fundraising, grant writing, managing stress, and working in court settings.

Building Brand

Communities Jun 14 2022 An authentic brand community is more than just people buying your product or working alongside one another. This book articulates the critical

roles of mutual concern, common values, and shared experiences in creating fiercely loyal customer and collaborator relationships. Smart organizations know that creating communities is the key to unlocking unprecedented outcomes. But too many mistakenly rely on superficial transactional relationships as a foundation for community, when really people want something deeper. Carrie Melissa Jones and Charles Vogl argue that in an authentic and enriching community, members have mutual concern for one another, share personal values, and join together in meaningful shared experiences, whether online or off. On the deepest level, brands must help members grow into who they want to be. Jones and Vogl present practices used by global brands like Yelp, Etsy, Twitch, Harley Davidson, Salesforce, Airbnb, Sephora, and others to connect in a meaningful way with the people critical for their success. They articulate how authentic communities can serve organizational goals in seven different areas: innovation, talent recruitment, customer retention, marketing, customer service, building transformational movements, and creating community forums. They also reveal principles to grow a new brand community to critical mass. This is the first comprehensive guide to a crucial differentiator that gives organizations access to untapped enthusiasm and engagement.

Communities in Action May 01 2021 In the United States,

some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Comprehensive Care Considerations for Individuals, Families, Organizations and Communities (and Caring for Self, Too!) May 21 2020
Seems like the busiest people

are most aware that they need help with the little things in life. Sometimes life throws us big things, such as facing decisions that involve the care of loved ones. Since you are one of these busy people, this Pocket Reference Book© gives you information you can use immediately as you consider your care-giving options, continue the care you already provide, or help others to make difficult decisions. Lessons learned. One of the most valuable gifts one can give in life other than unconditional love is the gift of lessons learned so that others succeed where we stumbled. This Pocket Reference Book© is a compilation of suggestions, advice, comfort, and encouragement from two professionals in the mental health and personal development industries. Both Beth and Sylvia have personally experienced the lessons learned in these pages by providing care to their respective loved ones. *The Meeting* Oct 18 2022 In writing this book I discovered that everyone I talked to had his or her own theory about meetings, and yet there is no theory of meetings in the research literature. This makes writing about this subject both exciting and hazardous. It is always exciting to examine the significance of something that has been ignored, but it is hazardous to write about something that everyone already thinks they understand. Without recourse to the legitimacy of a research tradition, readers are likely to evaluate this study based on

their own theory. I have tried to take this into account by discussing what might be referred to as American folk theory about meetings (see particularly Chapter 3), and also by juxtaposing my own research in an American organization with research in traditional or non-Western societies as conducted by anthropologists. This juxtaposition throws into relief some of the important differences as well as similarities in views of meetings as well as the form of meetings across cultures. It is also the only way that I know to examine how and when one's cultural context is affecting one's theoretical constructions. If this book is successful, it will challenge what I believe is the most common interpretation of meetings found in American society, that is, that meetings are a blank-slate phenomenon useful as a tool for such functions as making decisions, solving problems, and resolving conflicts, but having no impact on behavior in and of themselves.

Empowerment Series: Generalist Practice with Organizations and Communities Jul 15 2022
EMPOWERMENT SERIES: GENERALIST PRACTICE WITH ORGANIZATIONS AND COMMUNITIES, 7th Edition is designed to help students better understand the dynamics of macro practice, and develop the competencies and practice behaviors required by the Council on Social Work Education's (CSWE) latest Educational Policy and Accreditation

Standards (EPAS). Authors Karen Kirst-Ashman and Grafton Hull are adept at creating interesting, realistic cases and practical examples that are skillfully woven into the main text. In clear and accessible writing, they emphasize the practical skills students will need to work effectively in the area of macro practice -- providing leadership, working with supervisors, managing conflict, working with the media, using new technological advances, fundraising, grant writing, and managing stress. The text continues to emphasize the connections between working for change in organizations and communities and the skills used in other generalist practice courses. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

[Organizing for Community Controlled Development](#) Oct 14 2019 Combines solid research, observation, and practical experience that speak forcefully to the need for both local place-based development and greater citizen involvement.

High Impact Philanthropy Jan 17 2020 High Praise for High Impact Philanthropy "Successful navigation through today's changing world of philanthropy requires greater understanding by nonprofits and donors. High Impact Philanthropy meets this need."-Roberta W. Gutman, Executive Director, Motorola Foundation "At a time when the terrain of American

philanthropy is so rapidly shifting in new and unprecedented ways, this bright and focused analysis stands as a beacon of innovative thinking for donors and community organizers alike. By sketching in bold strokes the case for more effective collaborative giving, this book may well help transform our communities in the twenty-first century."-Peter deCourcy Hero, President, Community Foundation Silicon Valley "High Impact Philanthropy provides a thoughtful analysis of how venture philanthropy is changing the way nonprofits run and how philanthropists give. Important parallels are made to the business world, demonstrating how nonprofits and donors can both benefit from putting their business hats on and running their organizations and giving programs like businesses."-Jan D'Alessandro Wadsworth, Vice President, AOL Foundation "High Impact Philanthropy is an effective and articulate guide to planning a major gifts strategy, soliciting major gifts from individuals in a personable and efficient manner, and integrating this essential task into the very structure of a nonprofit organization."-Claude Rosenberg, Founder, New Tithing Group

The Handbook of Large Group Methods Apr 19 2020 Large Group Interventions are methods used to gather a whole system together to discuss and take action on the target agenda. That agenda varies from future plans,

products, and services, to redesigning work, to discussion of troubling issues and problems. The Handbook of Large Group Methods takes the next step in demonstrating through a series of cases how Large Group Methods are currently being used to address twenty-first-century challenges in organizations and communities today, including: Working with widely dispersed organizations, and the problem of involvement and participation Working with organizations facing a serious business crisis Working with organizations in polarized and politicized environments Working in community settings with diverse interest groups Working at the global level and adapting these methods for cross-cultural use Embedding and sustaining new patterns of working together in organizations and communities **The Open Organization** Jul 23 2020 This is a story of reinvention. Jim Whitehurst, celebrated president and CEO of one of the world's most revolutionary software companies, tells first-hand his journey from traditional manager (Delta Air Lines, Boston Consulting Group) and "chief" problem solver to CEO of one of the most open organizational environments he'd ever encountered. This challenging transition, and what Whitehurst learned in the interim, has paved the way for a new way of managing—one this modern leader sees as the only way companies will successfully function in the future. Whitehurst says beyond embracing the technology that

has so far disrupted entire industries, companies must now adapt their management and organizational design to better fit the Information Age. His mantra? "Adapt or die." Indeed, the successful company Whitehurst leads—the open source giant Red Hat—has become the organizational poster child for how to reboot, redesign, and reinvent an organization for a decentralized, digital age. Based on open source principles of transparency, participation, and collaboration, "open management" challenges conventional business ideas about what companies are, how they run, and how they make money. This book provides the blueprint for putting it into practice in your own firm. He covers challenges that have been missing from the conversation to date, among them: how to scale engagement; how to have healthy debates that net progress; and how to attract and keep the "Social Generation" of workers. Through a mix of vibrant stories, candid lessons, and tested processes, Whitehurst shows how Red Hat has blown the traditional operating model to pieces by emerging out of a pure bottom up culture and learning how to execute it at scale. And he explains what other companies are, and need to be doing to bring this open style into all facets of the organization. By showing how to apply open source methods to everything from structure, management, and strategy to a firm's customer and partner

relationships, leaders and teams will now have the tools needed to reach a new level of work. And with that new level of work comes unparalleled success. The Open Organization is your new resource for doing business differently. Get ready to make traditional management thinking obsolete. *The Social Work Field Placement* Dec 28 2020 This unique core text helps BSW and MSW students structure their field placement learning around the nine CSWE professional social work competencies. Empowering students to go beyond merely completing tasks, the book facilitates mastery and integration of these competencies by elucidating key concepts and applying them to realistic competency-based case scenarios. Each user-friendly chapter—directly linked to a particular competency—promotes thought-provoking reflection about field work with critical thinking questions, a detailed case example, and an online competency reflection log template. These tools reinforce learning by connecting competencies directly to students' internship experiences. Cases are structured to serve as models when students prepare their own cases and include a review of the competency; detailed practice settings; socioeconomic and context factors at micro, macro, and mezzo levels; a problem overview; an assessment of client strengths and weaknesses; and a closing

summary. Additional learning aids include chapter opening vignettes and objectives, plus chapter summaries. Web and video links offer students a wealth of supplemental resources, and a robust instructors package provides teachers with PowerPoints, written competency assignments with grading rubrics, and discussion exercises. The print version includes free, searchable, digital access to entire contents of the book. Key Features: Integrates field placement experiences with the nine CSWE 2015 competencies Promotes thought-provoking reflection about fieldwork with detailed case studies and challenging learning tools Includes discussions of ethical dilemmas, technology, and social media to reflect growing use and the challenges associated Includes online instructors' resources including, PowerPoints, written competency assignments with grading rubrics, and class discussion field reflection activities Print version includes free, searchable, digital access to entire contents of the book [Building Successful Communities of Practice](#) Jun 21 2020 Connecting with other people, finding a sense of belonging and the need for support are natural human desires. Employees who don't feel supported at work don't stay around for long - or if they do, they quickly become unmotivated and unhappy. At a time when organisational structures are flattening and workforces are increasingly fluid, supporting and

connecting people is more important than ever. This is where organisational communities of practice come in. Communities of practice have many valuable benefits. They include accelerating professional development; breaking down organisational silos; enabling knowledge sharing and management; building better practice; helping to hire and retain staff; and making people happier. In this book, Emily Webber shares her learning from personal experiences of building successful communities of practice within organisations. And along the way, she gives practical guidance on creating your own.

Building Connected

Communities of Care Sep 17 2022 As a community, aligning efforts across a community to support the safety and well-being of vulnerable and underserved individuals is extraordinarily difficult. These individuals suffer disproportionately from health issues, job loss, a lack of stable housing, high utility costs, substance abuse, and homelessness. In addition to medical care, these individuals often critically need access to community social sector organizations that provide a distinct and complementary set of services, such as housing, food services, emergency utility assistance, and employment assistance. These services are just as vital as healthcare services to these individuals' long-term health and well-being, with data suggesting that 80-90% of health outcomes can be attributed to

factors beyond direct medical intervention. This book proposes a novel approach to the coordination of medicine and social services through the use of people, process, and technology, with the goal being to streamline coordination between medical and Community-Based Organizations and to promote true cross-sector patient and client advocacy. The book is based on the experience of Dallas, TX, which was one of the first metropolitan regions to develop a comprehensive foundation for partnership between a community's clinical and social sectors using web-based information exchange. In the 5 years since the initial launch, the authors have been able to provide seamless connection, communication, and coordination between healthcare providers and a wide array of community-based social service organizations (a/k/a Community-Based Organizations or CBOs), criminal justice entities, and various other community organizations, including non-collegiate educational systems. This practical how-to guide is the codification of transferrable lessons from successes and challenges faced when working with clinical, community, and government leaders. By reading this playbook, leaders interested in building (or expanding) connected clinical-community services will learn how to: 1) facilitate cross-sector care coordination; 2) enable community care partners to better provide targeted services to community residents; 3) reduce duplication

of services across partnering organizations; and 4) help to bridge service gaps in the currently fragmented system. Implementation of services, as recommended in this book, will ultimately streamline assistance efforts, reduce repeat crises and emergency funding requests, help address disparities of care, and improve the health, safety, and well-being of the most vulnerable community residents.

Resolving Identity-Based Conflict In Nations, Organizations, and Communities Aug 04 2021

Conflict can either destroy or create—depending on whether and how it is guided. This is the simple yet profound insight that underlies Jay Rothman's innovative new framework for understanding and transforming identity-based conflict in nations, organizations, and communities. Reading a newspaper, working in an organization, or sitting in on a town meeting can provide vivid examples of identity conflicts in action. Based in the national, organizational, and community groups that provide individuals with meaning, safety, and dignity, identity conflicts are passionate and volatile because they strike at our core: who we really are and what we care about most deeply. Though often impervious to traditional methods of conflict management, identity-based conflict also provides adversaries with dynamic opportunities for finding not only common ground, but higher ground than separate parties could have found on

their own. Grounded in his grassroots conflict resolution work in the Middle East — work that earned him the honor of witnessing the historic White House handshake between Prime Minister Yitzhak Rabin and PLO President Yasser Arafat — and brilliantly refined to address a wide range of organizational and community conflicts, Rothman's ARIA model is a versatile and innovative synthesis of the best contemporary ideas in conflict management, resolution, and transformation. Step by step, *Resolving Identity-Based Conflict* traces the ARIA journey through Antagonism, Resonance, Invention, and Action in a variety of environments. In straightforward, jargon-free language, Rothman conveys solid theoretical insights and practical how-to's that allow researchers and practitioners to: Recognize the crucial differences between identity- and resource-based conflicts Zero in on the needs and motivations shared by even the bitterest of adversaries Create joint agendas for groups in conflict Transform intragroup and intergroup conflicts in organizations of every k

The Handbook of Large Group Methods Oct 26 2020 Large Group Interventions are methods used to gather a whole system together to discuss and take action on the target agenda. That agenda varies from future plans, products, and services, to redesigning work, to discussion of troubling issues and problems. The Handbook of

Large Group Methods takes the next step in demonstrating through a series of cases how Large Group Methods are currently being used to address twenty-first-century challenges in organizations and communities today, including: Working with widely dispersed organizations, and the problem of involvement and participation Working with organizations facing a serious business crisis Working with organizations in polarized and politicized environments Working in community settings with diverse interest groups Working at the global level and adapting these methods for cross-cultural use Embedding and sustaining new patterns of working together in organizations and communities

The Unheard Voices Sep 05 2021 Community organizers reveal what service learning is- and what it should be.

Digital Social Work Jul 03 2021 In a rapidly advancing technological culture, social work practitioners are frequently challenged to invent new strategies to meet client needs and foster social change. Despite the Council on Social Work Education's new standards for technology in social work practice, few schools of social work teach the use of technology for practice, and many instructors struggle with the integration of this increasingly necessary dimension into education. *Digital Social Work* is designed to offer engaging, meaningful, and easy-to-use technology content that can be incorporated into generalist and advanced social work

practice courses. The chapters in this volume offer instructors and students insight into the knowledge, skills, and values required of those who practice social work 2.0; by providing concrete examples of technology tools, they complement traditional social work curricula dealing with micro, mezzo, and macro systems. Chapters can be used singly--to augment Practice, Research, or Policy courses--or can provide a format to discuss technology in courses addressing practice with individuals, youth, and families. Virtual worlds, social media, GIS, blogs, and many other technology tools are represented in this collection.

[Organizational Innovation Communities](#) Dec 20 2022 Open source, community and crowd innovations have not only drastically changed the way products and services are developed, but also the way we work and live. Yet, organizations of all kinds, may they be small or large, globalized or local, etc., still struggle to effectively adapt to this social, however, technology-enabled trend. This work sheds light on community-based innovation development within organizations, i.e. organizational innovation communities. Three major questions are tackled: How to introduce organizational innovation communities, or how to build communities from scratch? How to manage organizational innovation communities, or can we manage creativity? How to foster employee engagement,

or how to turn ordinary employees into innovation hot-spots? Based on qualitative as well as quantitative research methods, the author derives in-depth and surprising insights as well as hands-on recommendations to speed-up, improve, and foster innovation development.

Organizations in the Shadow of Communities Apr 12 2022 The concept of a community form is drawn upon in many subfields of organizational theory. Although there is not much convergence on a level of analysis, there is convergence on a mode of action that is increasingly relevant to a knowledge-based economy marked by porous and shifting organizational boundaries. We argue that communities play an underappreciated role in organizational theory - critical not only to occupational identity, knowledge transfer, sense-making, social support, innovation, problem-solving and collective action but, enabled by information technology, increasingly providing socio-economic value - in areas once inhabited by organizations alone. Hence we posit that organizations may be in the shadow of communities. Rather than push for a common definition, we link communities to an organization's evolution: its birth, growth and death. We show that communities represent both opportunities and threats to organizations and conclude with a research agenda that more fully accounts for the potential of community forms to be a creator (and a possible destroyer) of value for

organizations.
