Bringing together a range of perspectives from communication and disability studies scholars, this collection provides a theoretical foundation along with practical solutions for the inclusion of disability studies within the everyday curriculum. It examines a variety of aspects of communication studies including interpersonal, intercultural, health, political and business communication as well as ethics, gender and public speaking, offering case study examples and pedagogical strategies as to the best way to approach the subject of disability in education. It will be of interest to students, researchers and educators in communication and disability studies as well as scholars of sociology and social policy, gender studies, public health and pedagogy.
