Reveals the clandestine activities of an American professor who retrieved eight thousand works of Soviet art by visiting dissident artists in the Soviet Union This book is the collection of papers from the latest International Uranium Mining and Hydrogeology Conference (UMH VII) held in September 2014, in Freiberg, Germany. It is divided to five sessions: Uranium Mining, Uranium and Phosphates, Clean-up technologies for water and soil. Uranium and daughter nuclides and basic research and modeling. Each session covers a wide range of related topic and provides readers with up to date research and solutions on those matters. Two Roads to Dodge City offers a vividly fresh look at today's Americans and their ways, by two gifted observers--father and son. This portrait of the country and its people from coast to coast is revealing, understanding, entertaining, and full of surprises. Nigel, the father, starts in Miami, driving in easy stages with stops in small towns and large cities up the coast to Canada, then down the middle of the country to New Orleans, and up to his rendezvous with Adam. Thanks to his frequent visits to the States and his fame as a writer, he has easy access to the grand houses as well as the modest, to leaders of society, government, business, academia, as well as folks in towns and roadside stops. Son Adam, not yet thirty, but already author of several books--one of which, *Frontiers*, won the 1986 Somerset Maugham Award--wanders a lower road from Los Angeles through San Francisco, Oregon, Idaho, Las Vegas, Phoenix, Santa Fe, and Wyoming. A tall, unmistakably upper-class Englishman, he has an uncanny gift for swiftly striking up acquaintance with any kind and age of man or woman. His California, for example, has an astonishing freshness, and his experiences with the young and wild, the comfy and the raunchy, the settled and the nomadic, are a joy to share. The diversity of the Nicholsons' adventures and views, together with the affection, argument, and mutual stimulus which link them across the ever-narrowing 3,000-mile gap, combine to make this an unusual and exciting book. "You'll never understand America until you've driven Route 66--that's old Route 66--all the way," a truck driver in California once said to author Rick Antonson. "It's the most famous highway in the world." With some determination, grit, and a good sense of direction, one can still find and drive on 90 percent of the original Route 66 today. This travelogue follows Rick and his travel companion Peter along 2,400 miles through eight states from Chicago to Los Angeles as they discover the old Route 66. With surprising and obscure stories about Route 66 personalities like Woody Guthrie, John Steinbeck, Al Capone, Salvador Dali, Dorothea Lange, Cyrus Avery (the Father of Route 66), the Harvey Girls, Mickey Mantle, and Bobby Troup (songwriter of "(Get Your Kicks on) Route 66"), Antonson's fresh perspective reads like an easy drive down a forgotten road: winding, stopping now and then to mingle with the locals and reminisce about times gone by, and then getting stuck in the mud, sucked into its charms. Rick mixes hilarious anecdotes of

happstance travel with the route's difficult history, its rise and fall in popularity, and above all, its place in legend. The author has committed part of his book's proceeds to the preservation work of the National Route 66 Federation. Celebrities such as Jay Leno, Mario Andretti, Patrick Dempsey, Danica Patrick reflect on their first cars. With a Haynes manual, you can do-it-yourself...from simple maintenance to basic repairs. In the spring and summer of 1875, Lt. Col. Richard Irving Dodge escorted the scientific expedition of geologist Walter P. Jenney into the Black Hills of the Dakotas to determine the truth of rumors of gold started by Gen. George Armstrong Custer the previous summer. The five-month trek north from Cheyenne, "Wyoming, challenged Dodge's 452 men with their wagons and animals, but in many respects it was "a delightful picnic (without the ladies)," as Dodge described it. Colonel Dodge wrote his journals daily in the field, and in their variety, discursiveness, and detail they convey clearly the pleasure he took in what he said was "the most delightful summer of my life." Yet he used only a small fraction of what he recorded in his subsequent official communications and published works. If it were not for this well-annotated and illustrated edition by Wayne R. Kime, readers would not have access to Dodge's experiences with such characters as the stowaway Calamity Jane or the eccentric mountain man and backwoods philosopher California Joe, who was hired to guide the expedition. Dodge's particular interests in hunting, fishing, and fine scenery also enliven his narrative, as do the politics dividing the miners from the Indians, and the soldiers from the scientists on the expedition. Black

Hills Journals of Colonel Richard Irving Dodge is by far the most detailed account yet available of the conflicting claims, interests, and populations that converged on the Black Hills during the key transitional period before the Great Sioux War of 1876. This book presents a comprehensive framework for understanding the processes by which peers shape each other's attitudes and behavior, and explores implications for intervention and prevention. Leading authorities share compelling findings on such topics as how drug use, risky sexual behavior, and other deviant behaviors "catch on" among certain peer groups or cliques; the social, cognitive, developmental, and contextual factors that strengthen or weaken the power of peer influence; and the nature of positive peer influences and how to support them. Each perspective covers the historical underpinnings of psychology, ending with current models and viewpoints as well as comments and critiques of the perspective. That's important and will help the next generation of scholars in psychology to appreciate alternative views. Nice book!" Joseph R. Ferrari, Ph.D, Vincent de Paul Distinguished Professor, DePaul University Addressing six perspectives, this textbook offers the framework for a conceptual understanding of modern psychology. Psychology: Six Perspectives shows students a measure of unity and continuity within this fragmented field by briefly and coherently discussing six primary perspectives that have arisen: biological, psychoanalytical, behavioral, humanistic, cognitive, and evolutionary. Author L. Dodge Fernald provides coherence by presenting these perspectives in successive historical order, offering students a broad, retrospective account of psychology. Key Features Portrays the fundamental dimensions of this multifaceted field: The similarities and differences among basic concepts, theories, research, and practice of each perspective are examined. Employs both a scientific mode of communication as

well as a narrative thread: The real-life narrative of a lonely, stout-hearted social worker unfolds gently throughout the text, illustrating in turn each of the perspectives. Stimulates critical thinking and class discussion: Opportunities for critical evaluation and everyday application provide students with a context for extending their understanding of and investigation into psychology. Intended Audience This core textbook or supplementary text is designed for undergraduate courses in general psychology, ranging from special sections of introductory psychology to the capstone course or senior seminar, including the history and systems of psychology. Lt. Col. Richard Irving Dodge's journals are the fullest firsthand account available of Gen. George Crook's Powder River Expedition against the Sioux and Cheyenne Indians, which culminated in Col. Ranald S. Mackenzie's resounding destruction of Dull Knife's forces on November 25, 1876. The history of wars caused by misjudgments, from Napoleon's invasion of Russia to America's invasion of Iraq, reveals that leaders relied on cognitive models that were seriously at odds with objective reality. *Blunders, Blunders, and Wars* analyzes eight historical examples of strategic blunders regarding war and peace and four examples of decisions that turned out well, and then applies those lessons to the current Sino-American case. Tristram Dodge was born in about 1607 in England. He married Anne and they had seven children. They immigrated to Rhode Island in about 1660. He died in 1683 in Shoreham, Rhode Island. Descendants and relatives lived mainly in Rhode Island New York, Connecticut, Massachusetts, Maine, Nova Scotia, Ohio, Illinois, Wisconsin. Michigan and Washington. Since the first models rolled off the assembly line in the early 20th century, automobiles have generated very varied feelings: for inventors they represented a vision; for builders they meant unlimited potential. And for whoever was lucky enough to own one, they meant realization of the dream and achieving an unquestioned status. This volume is a fabulous photographic catalogue of a range of important and influential models throughout a century of auto history. The vehicles presented in these pages are still today unrivalled objects of design. Detailed studio images taken by one of the world's most famous automobile photographers dramatically present the exceptional characteristics that make each car a work of art, while the brief yet incisive commentary narrates the background and the anecdotes associated with each model. The volume is divided into five chapters, each one dedicated to a specific quality that determines a model's success: the fun factor, prestige, speed, power, and beauty. The first group, cars that are fun to drive, includes such memorable vehicles as the 1957 Chevrolet Bel Air, the 1973 De Tomaso Pantera, and many more. The prestige cars include the elegant 1930 Rolls Royce Boattail Convertible, and the 1964 Aston Martin DB5. The speed group includes the superfast 1958 Chevrolet Corvette, the 2004 Porsche Carrera GT, and the 2007 Ferrari 599 GTB Fiorano. The power group looks at such high horsepower models as the 1967 Shelby Cobra 427 Convertible, the 1985 Lamborghini Countach, and the 2003 Enzo Ferrari. The fifth group - beauty and design - presents the 1938 Bugatti Type 57C, and the 1992 and 2008 Dodge Vipers. The volume's concluding section presents a portfolio of technical sheets for each model in the book; they are classified according to the five main themes.
